Student-Centered Research James Pelech, 2021-06-01 Teachers increasingly are being charged to conduct research on teaching and learning in their classes Action research is an instrument that teachers can use for their particular classroom to meet this charge While traditional research provides effective guidelines for teaching and learning its generalized format does not take into consideration the multitude of variables that affect individual classrooms and students Action research enables the teacher to improve the learning of the students in their particular context this in turn improves the professional practice of the teacher The uniqueness of the model presented in this book is that this model is guided by specific constructivist principles These principles are then transformed into learning strategies and applied to the action research cycle Each stage of the action research process also is steered by prompts emanating from the constructivist philosophy The prompts provide questions that the teacher can use to examine current practices and consider new approaches The blending of constructivism and action research enables the teacher to create a new cognitive framework for understanding and enhancing student learning This book provides a guide for combining two important traditions resulting in a research platform which creates new knowledge about both students and teachers

Guide to Transforming Teaching Through Self-Inquiry James Pelech, 2013-07-01 In the past twenty years the importance of reflection has been recognized by all professions especially the education profession In the field of education terms and practices such as reflective practice action research journaling collaborative observation professional development peer observation and professional portfolios have become organizing units of discussion and practice This book extends knowledge in the field not just by providing prompts

and examples of things to do but also by presenting an organized and cohesive system consisting of definitions principles and guidelines that can be used for all reflective practice activities This system blends ideas and concepts from phenomenology the Constructivist philosophy experiential learning critical reflection theories on turning knowledge into action and transformative learning Moreover the book creates a logical system for reflective practice that provides a foundation for a framework that organizes teacher transformation through reflection This system is anchored by the practical examples provided thus making this book practical for all those interested in improving student learning The strength of this book is that it is not a recipe type publication rather it is a cohesive system which creates a rationale for the system presents the system and provides many examples The intended audience includes practitioners teacher educators teacher candidates and administrators
