should be embraced This book will help equip these people with the grounding needed to evaluate trends and with specific suggestions for moving forward With short accessibly written chapters it helps pastors and leaders stay up to date with current trends and is an excellent resource for teaching in college and seminary classrooms The Praeger Handbook of Urban Education Philip M. Anderson,Kecia Hayes,Joe Kincheloe,Karel Rose,2006-03-30 Maintaining that urban teaching and learning is characterized by many contradictions this work proposes that there is a wide range of social cultural psychological and pedagogical knowledge urban educators must possess in order to engage in effective and transformative practice It is necessary for those teaching in urban schools to be scholar practitioners rather than bureaucrats who can only follow rather than analyze understand and create Ten major sections cover the myriad issues of urban education as it exists today *Men and Masculinities* Daniel Tillapaugh,Brian L. McGowan,2023-07-03 There continues to be much concern about the retention and persistence of men in college particularly Black Latinx and Native American men In addition queer and trans men also have found institutions to be problematic spaces For those who do persist we know that men are overrepresented in student conduct cases and engage in risky behaviors around alcohol drug use and sexual relationships Additionally we know that college men have historically avoided engaging in help seeking behaviors for their academic and personal success This book addresses the ways that theory can be put into practice for powerful transformative learning to support college men and their development This book synthesizes the research of the past three decades on college men to inform college student educators on the developmental needs of college men and illuminates how young men are socialized prior to their arrival to campus but perhaps more importantly how the collegiate environment becomes a training ground for the socialization of masculinities by students their peers and their environments Beyond that it sets out how practitioners can help young men understand why and how they have been socialized around their gender identity but also what their gender identity and sense of masculinity means for their future selves The book highlights programs and services designed to have college men engage with and dialogue around issues of hegemonic toxic or unhealthy aspects of masculinity These promising practices can offer college men opportunities to understand their power privilege and identity in ways that can be affirming and healthier leading to more life giving chances This is all the more important in the context of an ever evolving society where traditionally held norms and expectations around gender particularly masculinities are shifting This book equips student affairs staff faculty and administrators to better support college men s development It offers readers insights ideas and models for adapting and developing programs services and initiatives that may meaningfully meet the needs of specific student populations while recognizing that there is no one size fits all approach to this work **Handbook of Research on Teacher Education** Marilyn Cochran-Smith,Sharon Feiman-Nemser,John McIntyre,Kelly E. Reddy, Bonnie TuSmith, 2002 Winner of the 2003 American Educational Studies Association Critics Choice Awards Winner of the 2003 Gustavus Myers Outstanding Book Award Did affirmative action programs solve the problem of

race on American college campuses as several recent books would have us believe. If so, why does talking about race in anything more than a superficial way make so many students uncomfortable? Written by college instructors from many disciplines, this volume of essays takes a bold first step toward a nationwide conversation. Each of the twenty-nine contributors addresses one central question: what are the challenges facing a college professor who believes that teaching responsibly requires an honest and searching examination of race? Professors from the humanities, social sciences, sciences, and education consider topics such as how the classroom environment is structured by race, the temptation to retreat from challenging students when faced with possible reprisals in the form of complaints or negative evaluations, the implications of using standardized evaluations in faculty tenure and promotion when the course subject is intimately connected with race, and the varying ways in which white faculty and faculty of color are impacted by teaching about race.

Multicultural Approaches to Health and Wellness in America Regan A. R. Gurung, 2014-04-21. Led by a UCLA-trained health psychologist, a team of experts describes non-traditional treatments that are quickly becoming more common in Western society, documenting cultural variations in health and sickness practices to underscore the diversity among human societies. This unique two-volume set describes the variety of cultural approaches to health practiced by people of varying cultural heritages and places them in stark context with traditional Western approaches to health care and medicine. Examining health practices such as Ayurveda, an ancient system of medicine that focuses on the body, the sense organs, the mind, and the soul, and traditional Chinese medicine (TCM), the author examines why these different approaches can explain some of the cultural variations in health behaviors, differences in why people get sick, and how they cope with illness. Traditional health care providers of all kinds, including clinicians, counselors, doctors, nurses, and social workers, will all greatly benefit by learning about vastly different approaches to health, while general readers and scholars alike will gain insight into the rich diversity of world culture and find the material fascinating.
