Mathematics Making Marks Making Meaning Carruthers and Worthington 2006 draw attention to one of the main goals of early years teaching that is to help children make links between the mathematics they have already encountered and continue to engage with at home and the more abstract mathematics of the school These authors suggest that by encouraging children to represent mathematical ideas in their own ways and crucially by talking to the pupils about the marks they have made we are given a window onto their thinking that may otherwise be inaccessible Liz Pumphrey NRICH This book draws on the authors many years of teaching children aged three to eight years and also on their extensive research with children in the home nursery and school The authors explain the development and range of young children s mathematical marks and visual representations showing how children make mental connections between their own early marks and subsequent abstract mathematical symbolism and go on to develop their own written methods Combining theory and practice this acclaimed book demonstrates how children s own mathematical graphics are highly creative and show deep levels of thinking The authors show how this is the key to success in school mathematics and to higher levels of achievement The authors are winners of TACTYC s 2003 Jenefer Joseph Award for the Creative Arts 3 8 awarded for their innovative work with children on mathematical graphics

*Supporting Child-initiated Learning* Sally Featherstone, 2013-06-20 Why is it that when children play some behave like butterflies flitting around among the flowers of the activities on offer landing for a moment before moving on to the next attractive flower activity while others behave with the single minded concentration of bees As children grow and learn they acquire skills through play and practical activities This recently acquired learning is tenuous and is secured through practice repeating the skills in different contexts with different people Only then will learning be hard wired for life It is now evident that where children are able to select resources play companions and activities for themselves they can practise emerging skills and concepts by selecting the resources they need and using them in ways which are unique to them This book written by a group of experts in early years practice explores the place and purpose of child initiated learning in high quality early years practice Child initiated learning is a key feature of the Early Years Foundation Stage
