ABSTRACT

Student Centered Methods have been the benchmark for assessing teaching and learning in the New Malawi Secondary School Curriculum. However, teaching of History has for a long period of time been associated with presentation of facts, otherwise known as *teaching in a traditional way*. Such teaching involves reading chapters and listening to lectures while making students copy huge chunks of notes henceforth, denying them critical thinking and interpretations of historical facts. Apparently, it does not come as a surprise to observe limited number of students enrolling for History subject for Malawi School Certificate of Education a situation that is worrisome. However, teaching of History in innovative way describes a kind of pedagogy that ensures students do not only understand other peoples' interpretations, but also help them learn to construct their own interpretations of past. Therefore, it is against this background that this study investigated the teachers' experiences on what involves teaching of History in innovative way, the challenges encountered and solutions to deal with such challenges while implementing these new student-centered methods. The study is both quantitative and qualitative in nature with Purposive and later Simple Random Sampling Technique used to sample History teachers from various secondary schools in Mangochi District, Malawi. The results revealed that, Innovative Teaching Methods are crucial in producing critical thinking, socialization, decision making and analysis among students. However, the study reveals lack of learning resources to be the main challenge with the need for all stakeholders to endeavor on mobilizing resources and foster professional development for History Teachers.

Key Words: Critical Thinking, Historical Thinking, Historical Interpretation, Innovative Teaching Methods

1. INTRODUCTION

The study of History in secondary school is of great importance as it helps to students to understand the past for posterity, develop a sense of nationalism and nurture reasoning skills (Namamba & Rao, 2017). However, for this to be achieved, a great deal of work needs to be done by teachers. Various student-centered techniques are the precursor for attaining such skills by students. However, in developing countries like Malawi, it has been found that teachers still cling to the old way of teaching with perceivable undue use of lecture method (Nyamwembe, Ondigi, & Kiio, 2011). Consequently, this among others does not only demotivate students to take the subject,
