Teaching Of Ethics In Higher Education The Teaching Of Ethics:

Ethics Teaching in Higher Education Daniel Callahan, Sissela Bok, 2012-12-06 A concern for the ethical instruction and formation of students has always been a part of American higher education Yet that concern has by no means been uniform or free from controversy The centrality of moral philosophy in the undergraduate curriculum during the mid 19th Century gave way later during that era to the first signs of increasing specialization of the disciplines By the middle of the 20th Century instruction in ethics had by and large become confined almost exclusively to departments of philosophy and religion Efforts to introduce ethics teaching in the professional schools and elsewhere in the university often met with indifference or outright hostility The past decade has seen a remarkable resurgence of the interest in the teaching of ethics at both the undergraduate and the professional school levels Beginning in 1977 The Hastings Center with the support of the Rockefeller Brothers Fund and the Carnegie Corporation of New York undertook a systematic study of the state of the teaching of ethics in American higher education

Ethics in Higher Education Maureen E. Squires, 2020 Higher education serves many purposes one of which is to prepare college and university students with the knowledge skills and dispositions necessary for employment Some would argue that this is the primary and even sole purpose of collegiate education However many also contend that university education is intended to broaden students minds and enable them to question investigate and think critically in order to be productive and engaged citizens Regardless of the lens through which higher education is viewed within any of these purposes is the need for ethical practices in teaching learning student engagement and overall operational structures Truly in every facet of university life ethical practices exist If institutions of higher education are the places where in part the global future is shaped then it is imperative that these same organizations be the exemplars of ethical practices The Practice of Ethics in Higher Education includes chapters that explore and examine topics such as teaching of ethics ethical practices on campus ethics of clinical practices ethics and leadership in the academy ethics in hiring practices at colleges universities ethics and campus sponsored research as well as other topics relevant to higher education In addition to drawing attention to the successes and challenges regarding ethical practices in higher education this book aims to encourage future research initiatives and collaborations

Teaching Ethics Instructional Models Methods and Modalities for University Studies encourages teachers and students to approach their work with a deep awareness that people not as disinterested reasoners devoid of or effectively cut off from passions make ethical judgments An individual's social and emotional constitution should be taken into account This collaborative publication offers salient instructional models methods and modalities centered on the whole person **Ethics Across the Curriculum—Pedagogical Perspectives** Elaine E. Englehardt, Michael S. Pritchard, 2018-05-08

This book features articles by more than twenty experienced teachers of ethics who are committed to the idea that ethics can and should be taught virtually anywhere in the education curriculum They explore a variety of ways in which this might best be done Traditionally confined largely to programs in philosophy and religion the teaching of ethics has in recent decades spread across the curriculum education The contributors to this book discuss the rationale for supporting such efforts the variety of challenges these efforts face and the sorts of benefits faculty and students who participate in ethics across the curriculum endeavors can expect An overriding theme of this book is that the teaching of ethics should not be restricted to one or two courses in philosophy or religion programs but rather be addressed wherever relevant anywhere in the curriculum For example accredited engineering programs are expected to ensure that their students are introduced to the ethical dimensions of engineering This can involve consideration of ethical issues within particular areas of engineering e g civil mechanical electrical chemical as distinctive segments of certain courses e g those that focus on design problems or as a full semester course in ethics in engineering Similar approaches can be taken in nursing medicine law social work psychology accountancy management and so on That is some emphasis on ethics can be expected to be found in broad range of academic disciplines However many ethical issues require careful attention from the perspectives of several disciplines at once and in ways that require their joining hands Recognizing that adequately addressing many ethical issues may require the inclusion of perspectives from a variety of disciplines makes apparent the need for effective communication and reflection across disciplines not simply within them This in turn suggests that faculty and their students can benefit from special programs that are designed to include participants from a variety of disciplines Such programs will be a central feature of this book

Although some differences might arise in how such issues might best be discussed across different parts of the curriculum these discussions might be joined in ways that help students faculty administrators and the wider public better appreciate their shared ethical ground

Teaching Bioethics K. Danner Clouser,1980 The past decade has seen a remarkable resurgence of interest in the teaching of ethics at both the undergraduate and professional school levels Beginning in 1977 The Hastings Center with the support of the Rockefeller Brothers Fund and the Carnegie Corporation of New York undertook a systematic study of the teaching of ethics in American higher education Our concern focused on the extent and quality of that teaching and on the main possibilities and problems posed by widespread efforts to find a more central and significant role for ethics in the curriculum As part of that project a number of papers studies and monographs were commissioned Moreover in an attempt to gain some degree of consensus the authors of those studies worked together as a group for a period of two years The study presented here represents one outcome of the project We hope and believe it will be helpful for those concerned to advance and deepen the teaching of ethics in higher education Foreword

The Lived Experiences of Teachers Teaching Ethics in a Mexican Institution of Higher Education Esther A. Enriquez-Perez,2015 This study is about how the promotion of teaching ethics values and citizenship education in institutions of public higher education in Mexico can be explained by the interplay

of three main forces 1 the forces of cultural globalization 2 the project democracy and 3 the local societal demands for the teaching of ethics and values The research question that guides this study is what are the lived experiences of teachers teaching ethics values and citizenship education in a Mexican public institution of higher education Six teachers of ethics engaged with the researcher in conversations about their live experiences of teaching ethics The experience of teaching ethics was contextualized in the global economic political and cultural arena Ethical values are promoted to counteract the intensification of corruption impunity insecurity and increase in organized crime in Mexico International Institutions of education promoted ethical values as a factor for social cohesion The theoretical framework for interpreting the experiences of teaching ethics was Bakhtin s ethics answerability For the collection of data I used Seidman s 1998 in depth phenomenological interview For the analysis and interpretation of the data i followed the phenomenological hermeneutic circle as presented by Cowan 1994 From that analysis I identified six themes 1 Ethics can change our society 2 is democracy a viable project 3 can values be taught 4 are moral values universal and timelessness 5 Is corruption and cheating a way to succeed and 6 the good citizen is the one who knows how to live with others I concluded that to achieve democracy as a viable project requires forming a true democratic citizen seeing democracy as a form of life The main concern of ethical reflection must be to form a responsible inclusive and participant citizen who respect the other and itself Thus I recommend that the ethics teachers discuss in a collegiate manner the different ways to teach in a democratic form and find the best possible code of ethics informed by an ethics of answerability as an aesthetics of love to the self and to the other
