## **Teaching What We Do:**

*Teaching What We Do* Richard Todd, Douglas C. Wilson, 1992-12-07 What goes on in a college classroom For all that has been written in recent years about higher education very little attention has been paid to the heart of the matter teaching This book by members of the Amherst College faculty helps to repair that oversight Amherst in defining itself places a large emphasis as it should on the life of the classroom No faculty member no matter how senior is excused from teaching no cadre of graduate students shoulders the load of introductory courses To teach is the central mission of an Amherst professor But seldom the only mission Almost everyone who teaches at Amherst also pursues research Maintaining the balance is sometimes frustrating but more often nourishing and exhilarating In his foreword Peter R Pouncey speaks of the way in which teaching and research cross fertilize each other He writes of the rejuvenating invitation of the classroom to confront the mild curiosity of the good natured young and see it rise in the face of your own interests and insistences first to eagerness and then to the sort of passion you remember and hope to sustain in yourself Again and again these essays by artist historian critic and scientist demonstrate that the pleasures and challenges of the classroom are inexhaustible And they provide us with glimpses of the true importance of the work that is done there As Professor Benjamin DeMott writes in a successful class the student is free to develop a thought to work up its implications to be unhurriedly serious about serious things in the company of attentive others At a time when the academy is under fire from various sides the reader will emerge from this book informed and heartened by its vision of the possibilities for higher education

Anna-Katharina Praetorius,Charalambos Y. Charalambous,2023-03-11 This open access book seeks to create a forum for discussing key questions regarding theories on teaching Which theories of teaching do we have What are their attributes What do they contain How are they generated How context sensitive and content specific do they need to be Is it possible or even desirable to develop a comprehensive theory of teaching The book identifies areas of convergence and divergence among the answers to these questions by prominent international scholars in research on teaching Initiating exchanges among the authors it then evaluates whether consensus can be reached on the areas of divergence The book concludes by discussing lessons learned from this endeavor and outlines steps that need to be taken for advancing future work on theorizing teaching As such the book is aimed at readers interested in an overview of the theorizing of teaching and key open questions that if addressed help to move the field forward      **Teaching Music Differently** Tim Cain,Joanna

Cursley,2017-07-14 *Teaching Music Differently* explores what music teachers do and why It offers insightful analysis of eight in depth studies of teachers in a range of settings the early years a special school primary and secondary schools a college a prison a conservatoire and a community choir and demonstrates that pedagogy is not simply the delivery of a curriculum or an enactment of a teaching plan Rather a teacher s pedagogy is complex nuanced and influenced by a multitude of factors Exploring the theories teachers hold about their own teaching it reveals that even when teachers are engaged with the same subject their teaching varies substantially It analyses the differences in terms of agency the knowledge and skills that teachers bring to teaching their expectations shaped by their life histories the ways in which they relate to their students and the subject and their ideas about the content they teach what is important what is interesting what is difficult for students to grasp It also explores the constraints that are imposed upon the teachers by curriculum policy institutions society and the students themselves Together with discussion of key ideas for understanding the case studies historical influences on music pedagogy and the main discourses around music teaching *Teaching Music Differently* invites all music education

Steele, Joleigh Honey, 2024-07-19 Foster a love of mathematics by creating a more inclusive and empowering learning environment through asset based teaching An asset based perspective on math education means starting with what students already know instead of focusing on what's missing This approach elevates student thinking and reasoning skills In this way educators acknowledge that all students bring prior experiences strengths talents and resources to the learning process and can contribute meaningfully in an authentic learning environment Transform Your Math Class Using Asset Based Teaching for Grades 6 12 provides insight into asset based perspectives in mathematics education to create an environment where all students feel valued and capable of being doers of mathematics In the book Michael Steele and Joleigh Honey highlight the importance of using language instructional routines and systemic structure that positively impact student engagement their math identity and ultimately their outcomes Providing a wealth of knowledge and practical strategies that can be used to transform math classrooms into inclusive supportive and empowering learning environments this book Introduces an asset based perspective that focuses on students strengths assets and potential to learn mathematics Includes a variety of frameworks and tools that teachers can use to build and grow their sense of asset based perspectives Offers strategies for promoting a growth mindset in mathematics encouraging productive struggle in math and promoting equitable math instruction Supports teachers in reflecting on their decisions self awareness and self management Includes a companion online study guide to support teachers individually or as part of a professional learning community Adopting asset based perspectives is about movement over time not about flipping a switch This book paves the path for an asset based journey that ultimately helps to transform our math classrooms and advance all students learning and development

Connecting the Dots in World History, A Teacher's Literacy-Based Curriculum Chris Edwards, 2015-10-16 In his previously written

articles and books Chris Edwards has argued that teaching should be considered a field that is separate from both the field of education and from the content area fields Teaching is a field which synthesizes content and method for classroom application All of the other major intellectual fields have a canon of works which practitioners can learn from and add to but teaching does not The Connecting the Dots in World History A Teacher s Literacy Based Curriculum series changes this by showing how effective a teacher generated curriculum can be These books can inspire other teachers to create their own curricula and inspire a change in the way that the public views teachers and teaching

Becoming a Teacher draws on Alan Newland's decades of professional work and academic study in education to set out the key principles for developing and understanding the professional values essential to becoming a good teacher. The book features a constructive examination of the Teachers' Standards and shares a series of illustrative scenarios, exemplar strategies and practical resources that will equip trainee teachers with easy to understand but justifiable rationales to deal with a range of contentious and sensitive issues that they are likely to encounter during the course of their career. It also explores a series of searching questions relating to the philosophical nature of teaching, the definitions of legal, ethical and moral responsibility as a teacher and what it means objectively to be professional. Becoming a Teacher therefore serves as a professional studies course reader for trainees and early career teachers as well as a core text for tutors, lecturers, mentors and CPD leads delivering both the compulsory aspects of the ITT Core Content Framework for all qualified teacher status QTS courses and Early Career Framework CPD.
