**Team Management** Charles J. Margerison, 1990      **Team Management** Charles Margerison, 2009-06

Team Management presents a set of powerful techniques developed by two influential thinkers and consultants Dr Charles Margerison and Dr Dick McCann. These techniques have been tested worldwide with great success and will improve team performance and business results. Drawing on the original findings of psychologist Carl Jung, they have incorporated his works into the Team Management Wheel, a management tool to aid self understanding, teamwork, career development, communication and leadership. This book provides a new and very effective approach to the development of high performing teams. Drawing upon their work over eight years with more than 100 000 managers throughout the world, the authors have identified critical areas of teamwork that recur consistently. They have synthesized their experience and research into key principles that are simple and when applied can lead to a quantum change in team performance. Why do some teams succeed and some teams fail? This important and very practical book provides the answers and gives the reader a proven model for creating and maintaining a winning team. The book also outlines the way in which managers can develop effective work teams and the various organizational processes that need to be put in place for this to be achieved. The practical models and tools within this book will also help the reader improve their own performance and that of any team they are involved with. Find out what your natural style is and where you are on the Team Management Wheel and learn to adapt your style to link with others. The experience will pay dividends throughout your career and personal life.

**How to Succeed as a Leader** Ruth Chambers, Kay Mohanna, Richard Jones, David Wall, 2018-04-19

This work includes a Foreword by David Nicholson, Chief Executive, National Health Service of England. In the past, there has been too little emphasis and investment made in developing leaders in healthcare. People have become leaders without being prepared or trained or supported in the role. Individuals need to understand the context, the concept and models of good leadership, the practical steps to becoming a good leader and how to sustain the various components of a well functioning and effective organisation, whether that is a large NHS trust or hospital department, a clinical group or practice team. This guide has been written by a range of writers from organisational consultancy and NHS backgrounds who are all experienced in developing and supporting leaders, planning and providing education and change management. It is specially designed for independent learning with answers to frequently asked questions, self assessment exercises and helpful tips. How to Succeed as a Leader is ideal for all healthcare professionals in or aspiring to leadership roles. It also provides inspiration for academics and workplace educators, managers and leaders in government, strategic health authorities and workforce deaneries. There is constant reorganisation and a changing culture in our health service. Good leadership is essential to address the changes required and take others with you so that the service can function effectively. There has been an amateurish approach to leadership in the NHS in the past where people have become leaders without being prepared or trained for the role or supported in it. This book is all about
