**Team Teaching at the College Level** Horatio M. LaFauci, Peyton E. LaFauci, Peyton E. Richter, 1970 *Team Teaching* Kathryn M. Plank, 2023-07-03 For those considering adopting team teaching or interested in reviewing their own practice this book offers an over view of this pedagogy its challenges and rewards and a rich range of examples in which teachers present and reflect upon their approaches The interaction of two teachers both the intellectual interaction involved in the design of the course and the pedagogical interaction in the teaching

of the course creates a dynamic environment that reflects the way scholars make meaning of the world. The process naturally breaks down the teacher-centered classroom by creating a scholarly community in which teachers and students work together to understand important ideas and where students don't just learn content but begin to understand how knowledge is constructed, grasp the connections between disciplines as well as their different perspectives, see greater coherence in the curriculum and appreciate how having more than one teacher in the classroom leads naturally to dialogue and active learning. Each of the five examples in this book shares the story of a course at a different institution and each is designed to reflect a number of different variables in team-taught courses. They represent courses in a variety of different disciplines including the sciences, social sciences, humanities and the arts and at a range of levels from first-year seminars to graduate courses. They also illustrate a number of different models for instructional teams such as faculty from the same disciplines, from related disciplines, from two very different disciplines, from different institutions and one pairing of a faculty member and a staff member. This book provides insight into the impact of team teaching on student learning and on faculty development. It also addresses the challenges both pedagogical and administrative that need to be addressed for team teaching to be effective.

**Team Teaching and Flexible Scheduling for Tomorrow ,      Resources in Education**  
,2000-04      Peer-Led Team Learning: Evaluation, Dissemination, and Institutionalization of a College Level Initiative Leo Gafney, Pratibha Varma-Nelson, 2008-06-24 There seems to be no end to the flood of conferences, workshops, panel discussions, reports and research studies calling for change in the introductory science courses in our colleges and universities. But there comes a time to move from criticism to action. In 1993 the Division of Undergraduate Education of the National Science Foundation called for proposals for systemic initiatives to change the way introductory chemistry is taught. One of the five awards was to design, develop and implement the peer-led Workshop, a new structure to help students learn science. This book is a study of 15 years of work by the Peer-Led Team Learning (PLTL) project, a national consortium of faculty learning specialists and students. The authors have been in the thick of the action as project evaluator Gafney and co-principle investigator Varma-Nelson. Readers of this book will find a story of successful change in educational practice, a story that continues today as new institutions, faculty and disciplines adopt the PLTL model. They will learn the model in theory and in practice and the supporting data that encourage others to adopt and adapt PLTL to new situations. Although the project has long since lost count of the number of implementations of the model, conservative estimates are that more than 100 community and four-year colleges and a range of universities have adopted the PLTL model to advance student learning for more than 20 000 students in a variety of STEM disciplines.
