Forum ,1989 *Resources in Education* ,2000 *Nature* ,1904 *Critical Memetic Literacies in English Education* Leah Panther, Darren Crovitz, 2023-12-01 This edited collection introduces English and literacy educators to the theoretical research based and practical dimensions of using digital memetic texts memes in the classroom Digital memetic texts come with new affordances particularly as avenues for student creativity voice and advocacy But these texts can also be put to manipulative propagandistic and nefarious purposes posing critical challenges to an informed democratic citizenry Grounded in multimodality and critical literacy this book investigates the fascinating digital dimension of texts audiences and meaning and considers how English educators might take up these conversations in practical ways with students With authentic examples from teachers and students this volume provides a road map to researchers and educators both preservice and in service interested in critical and productive uses of these modern phenomena **Technical Writing** Thomas Arthur Rickard, 1923 **Look Japan** ,1997 **Non-native English-speaking Engineers' Writing at the Workplace** Juan Du, 2019-12-10 Based on 55 semi structured in depth interviews this book investigates 15 high tech engineering co op professionals writing experience in the workplace It shows how the digital age has had a marked impact on the engineers methods of communication at work and how on the job writing has affected engineers technical competence shaped their

professional identities challenged their views on Chinese and English writing and hindered their success in the workplace. The book identifies three aspects of writing practice: engineers' linguistic and literacy challenges, the reasons behind these challenges, and coping strategies which suggest that engineers are underprepared and lack necessary support in the workplace. Lastly, the study shows that engineers need to engage in technical literacy through on-the-job writing so that they can fully deal with workplace discourse and socialize with diverse professional groups. Since the sample group interviewed in this book is engineers who studied at universities in the United States and have a foot in the world of school and work as well as knowledge of both Eastern and Western cultures, the book appeals to teachers, students, engineers, and scientists who are interested in scientific and technological writing. It is also valuable for educators who prepare scientists, engineers, and technical communicators for professional roles as well as for communication practitioners who work with engineers.
