Technical Fouls Democracy And Technological Change:

Technical Fouls John Kurt Jacobsen, 2018 **Technical Fouls** John Kurt Jacobsen, 2000 Examines the interaction of ideology profits and power and their combined effect upon technology policy in democracies *Technical Fouls* John Kurt Jacobsen, 2018-02-07 What is it that shapes the direction of technological progress in advanced industrial societies Is it science Technology itself Or is it something even more powerful and all encompassing like power or money or politics John Kurt Jacobsen addresses this topic by investigating how contemporary democratic capitalist states govern the development and deployment of their scientific and technological resources He examines the interaction of ideology profits and power and their combined effect upon technology policy in democracies The social function of science has been a contentious area of scholarly study throughout the second half of the twentieth century Although the book focuses mainly on the United States for the sake of instructive comparison it also studies technological development of other societies including the former Soviet Union and China Some competing accounts of technical change across the borders include laissez faire cultural and neo Marxist markets In fact with regard to laissez faire markets even to inquire if science has a social function is to deviate from the appropriate images of economic development What is always politically at stake is who will rule the next stage in production due to each swing in technology which will in turn be associated with a new structure of control Most recently the microchip revolution and cyberspace are the most highly publicized candidates for the next upswing in technology and thus the next new structure of control The explanatory focus of the book is on ideology or on ideas about how technology works and should work and the three key areas of policy contention discussed are industrial development military uses and the environment Students and scholars of science technology and sociology should find this book useful in coming to terms with the fundamental questions underlying the development of technology today *The Shock of the Old* David Edgerton, 2011-08-29 In this new history David Edgerton invites us to rethink how technology is used For instance horses contributed more to Nazi conquests than the V2 In influence IKEA founder Ingvar Kamprad matches Bill Gates And corrugated iron is not dead yet **Social Research** Matthew David, Carole D Sutton, 2011-01-19 The perfect book for any student taking a research methods course for the first time The new edition of David and Sutton's text provides those new to social research with a comprehensive introduction to the theory logic and practical methods of qualitative quantitative and mixed methods research Covering all aspects of research design data collection data analysis and writing up Social Research An Introduction is the essential companion for all undergraduate and postgraduate students embarking on a methods course or social research project The second edition features Brand new chapters on visual methods case study methods internet research mixed methods and grounded theory Updated chapters on interviews questionnaire design surveys and focus groups Improved coverage of qualitative and quantitative methods of data analysis including practical instruction on the latest versions of software packages NVivo 8 and SPSS 18 An attractive new layout which aids navigability and enhances the

book's student learning features A companion website www.uk.sagepub.com david with PowerPoint slides and links to useful websites Many more practical examples helping bring theory to life Designed for social science students with no previous experience this book provides a balanced foundation in the principles and practices of social research *Technical Fouls* John Kurt Jacobsen,2019-09-13 What is it that shapes the direction of technological progress in advanced industrial societies Is it science Technology itself Or is it something even more powerful and all encompassing like power or money or politics John Kurt Jacobsen addresses this topic by investigating how contemporary democratic capitalist states govern the development Freud's Foes Kurt Jacobsen,2009-08-16 Freud's Foes the latest title in the Polemics series addresses Freud's fiercest contemporary critics Kurt Jacobsen defends psychoanalysis while accepting that it has inherent flaws He argues that although today's foes pose as daring savants they are only the latest wave of critics that psychoanalysis has encountered since its controversial birth and he easily debunks their arguments **International Handbook of Self-Study of Teaching and Teacher Education Practices** J. John Loughran,Mary Lynn Hamilton,Vicki Kubler LaBoskey,Tom L. Russell,2007-07-03 The International Handbook on Self study of Teaching and Teacher Education Practices is of interest to teacher educators teacher researchers and practitioner researchers This volume offers an encyclopaedic review of the field of self study examines in detail self study in a range of teaching and teacher education contexts outlines a full understanding of the nature and development of self study explores the development of a professional knowledge base for teaching through self study purposefully represents self study through research and practice illustrates examples of self study in teaching and teacher education **Reclaiming the Enlightenment** Stephen Eric Bronner,2004-10-06 This book tackles an obvious yet profound problem of modern political life the disorientation of intellectuals and activists on the left As the study of political history and theory has been usurped by cultural criticism a confusion over the origins **Planetary Politics** Stephen Eric Bronner,2005 Global society has been analyzed in any number of ways books dealing with its economic and cultural implications flood the market But Planetary Politics highlights something unique It explores globalization with an eye on the transformation of politics into a planetary enterprise Unifying this collection is a political purpose the attempt to engage in progressive fashion the dominant trends the terrible excesses and the positive prospects in a decidedly new era marked by the transition from a corrosive interplay between nation states to a burgeoning planetary politics Bringing together the work of major scholars with national and international reputations this exciting new work offers perspectives for dealing with the complexity of power in the planetary life of the new millennium **Descent of the Dialectic** Michael J. Thompson,2024-08-01 This book reconstructs the concept and practice of dialectics as a means of grounding a critical theory of society At the center of this project is the thesis of phronetic criticism or a form of reason that is able to synthesize human value with objective rationality This book argues that defects in modern forms of social reason are the result of the powers of social structure and the norms and purposes they embody Increasingly modern societies are driven not by substantive values

concerning human good but by the technical imperatives of economic management leading to a cultural condition of nihilism that has eroded dialectical consciousness The first half of the book demonstrates the various ways that social power erodes and undermines critical rational forms of consciousness The second part of the book constructs an alternative basis for critical reason by showing how it requires seeing human value as essentially ontological that is constituted by objective forms of sociality that either promote human freedom or pervert our capacities and drive toward pathological forms of life The philosophical claim is that a critical theory of ethics must be rooted in these concrete forms of life and that this will serve as a critical vantage point for critical political judgment and transformational praxis *Descent of the Dialectic* will be of interest to researchers working in philosophy political theory social theory and critical theory Writing Assessment and the Revolution in Digital Texts and Technologies Michael R. Neal, 2015-04-17 This text provides an innovative new framework for the formative and holistic assessment of students digital writing It also addresses the rapid evolution of writing assessment tools analyzing the research in clear terms for both techno phobic and techno savvy teachers The author critiques computer automated scoring of student writing for example but also considers the possibilities and potential of the future of technology assisted assessments Technology and Culture , 2002 Science in Society Matthew David, 2017-03-16 Science Technoscience has moved to centre stage in debates over change power and justice in twenty first century societies This text provides a general framework for understanding combining and applying the rich range of approaches that exist within sociology about science in particular the role and limitations of science in generating knowledge and the relationship between scientific knowledge and social progress Drawing on case studies from the past up until today s new genetics this is a clear even handed and comprehensive introduction to the field *Psychoanalysis, Science and Power* Kurt Jacobsen, R. D. Hinshelwood, 2022-11-30 *Psychoanalysis Science and Power* reexamines the current state of psychoanalysis and science and technology studies as they have been influenced by Robert Maxwell Young s work Robert Maxwell Young a Texas migr to Britain was a scholar publisher TV documentarian psychoanalytic psychotherapist journal editor conference organizer and political activist Young urged that psychoanalysis particularly in its Kleinian incarnation illuminated new aspects of science and technology studies and vice versa This volume not only provides an overview of Young s life and interests by a stellar cast of scholars and practitioners but also commemorates the many and intersecting streams of his contributions reasoning for their continuing relevance in the contemporary studies of psychoanalysis biological sciences technology and Darwinian thought Presenting perspectives that are rigorously analytical and yet often poignant *Psychoanalysis Science and Power* will be an important read for students analysts and analytic therapists of all orientations who are interested in broadening their understanding of their practice **Reconsidering American Power** John D. Kelly, Kurt Jacobsen, Marston H. Morgan, 2019-12-05 Postcolonial studies postmodern studies even posthuman studies emerge and intellectuals demand that social sciences be remade to address fundamentals of the human condition from human rights to global environmental crises

Since these fields owe so much to American state sponsorship is it easier to reimagine the human and the modern than to properly measure the pervasive American influence *Reconsidering American Power* offers trenchant studies by renowned scholars who reassess the role of the social sciences in the construction and upkeep of the Pax Americana and the influence of Pax Americana on the social sciences With the thematic image for this enterprise as the fiery hunt for Ahab's whale the contributors pursue realities behind the theories and reconsider the real origins and motives of their fields with an eye on what will deter or repurpose the fiery hunts to come by offering a critical insider's view

Technology Matters David E. Nye, 2007-08-24 Discusses in nontechnical language ten central questions about technology that illuminate what technology is and why it matters *Technology matters* writes David Nye because it is inseparable from being human We have used tools for more than 100 000 years and their central purpose has not always been to provide necessities People excel at using old tools to solve new problems and at inventing new tools for more elegant solutions to old tasks Perhaps this is because we are intimate with devices and machines from an early age as children we play with technological toys trucks cars stoves telephones model railroads Playstations Through these machines we imagine ourselves into a creative relationship with the world As adults we retain this technological playfulness with gadgets and appliances Blackberries cell phones GPS navigation systems in our cars We use technology to shape our world yet we think little about the choices we are making In *Technology Matters* Nye tackles ten central questions about our relationship to technology integrating a half century of ideas about technology into ten cogent

and concise chapters with wide ranging historical examples from many societies He asks Can we define technology Does technology shape us or do we shape it Is technology inevitable or unpredictable Why do experts often fail to get it right How do historians understand it Are we using modern technology to create cultural uniformity or diversity To create abundance or an ecological crisis To destroy jobs or create new opportunities Should the market choose our technologies Do advanced technologies make us more secure or escalate dangers Does ubiquitous technology expand our mental horizons or encapsulate us in artifice These large questions may have no final answers yet but we need to wrestle with them to live them so that we may as Rilke puts it live along some distant day into the answers *Handbook on Social Structure of Accumulation Theory* McDonough, Terrence,McMahon, Cian,Kotz, David M.,2021-12-07 This pioneering Handbook offers a state of the art exploration of the social structure of accumulation theory a leading theory of stages of capitalism expertly summarising its development to date It breaks new ground in several areas including econometric evidence for the theory and developing institutional analyses of technology and the environment
