Office of Personnel Management. Office of Classification,1990      **Human Investment Management** Prabhakaran Paleri,2017-08-30 This book presents a thought provoking case for looking at human resource management from an entirely different perspective In the modern world organizations have to optimally manage resources to achieve the best results and the best way to do this is to identify humans as instruments of investment and not as resources Humans use resources in an activity Managing people as a subject was first studied as part of personnel management and became known as human resource management HRM in the early 80s However the basic principles remained largely unchanged The book argues that it is time that HRM is replaced by human investment management HIM where the entire approach of employee management in an organization shifts gears to human investment in activities In this approach no human is considered bad in relation to an organization if selected appropriately and trained well Everyone is productive though the returns may differ Humans can be invested in areas where they are best or can be trained to be the best according to various factors Unlike any other investment instruments humans value can be continuously upgraded for higher returns Thus the core of HIM is to maximize the return from each employee as an individual or as a member of the group with minimum expenditure and effort in him or her HIM can therefore reengineer and replace HRM slowly and steadily at the desired pace where maximum attention is paid to employee investment for improved results This is unlike HRM which primarily focuses on employee relations Turning around HRM to HIM will be the first step in inclusively aligning strategic human resource management

with the overall human management As such HIM should be seen as a process by which the asset or capital value of individual humans can be increased by turning them into capital humans an entirely different outlook from the oft used term human capital **Army Logistician** ,1981 Cases on Performance Measurement and Productivity Improvement: Technology Integration and Maturity Khosrow-Pour, Mehdi,2012-08-31 One of the main aspects of an organization is the efficiency of managerial concerns daily interactions and the design and implementation of its business system Therefore integrating the latest technology is vital in assisting in the performance and productivity improvement of an organization Cases on Performance Measurement and Productivity Improvement Technology Integration and Maturity highlights the successes and failures which have shaped the modern business as well as the technological solutions taken to improve the organizational system Providing essential research on these applied innovations this collection of case studies appeals to both academics and practitioners in the business and IT management fields *Development Planning and Management* Mr. Rohit Manglik,2024-03-27 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels *Educational Leadership* Donnie Adams,2023-12-21 This book provides a rigorous grounding in contemporary educational leadership theories and their application to policy and practice globally across educational contexts The book showcases contributions from authors with a deeply embedded understanding of educational leadership and in schools context It will focus on major aspects of school leadership including contemporary theories and models in the 21st century the role of the principal the work of senior and middle leaders leadership and student outcomes Each chapter will engage with theory policy and practice and draw on authors own research and with other empirical and conceptual sources **The New Development of Technology Enhanced Learning** Ronghuai Huang,Kinshuk,Nian-Shing Chen,2014-07-01 The book addresses the main issues concerned with the new development of learning processes innovative pedagogical changes the effects of new technologies on education future learning content which aims to gather the newest concepts research and best practices on the frontiers of technology enhanced learning from the aspects of learning pedagogies and technologies in learning in order to draw a picture of technology enhanced learning in the near future Some issues like e learning m learning u learning innovative approaches the Framework and Method for Understanding the New Generation Students Context aware Mobile Role Playing Game for Learning Pedagogical issues in content creation and use IT literacy through Spoken Tutorials Supporting collaborative knowledge construction and discourse in the classroom Digital Systems for Hierarchical Open Access to Education Using Annotated Patient Records to Teach Clinical Reasoning to Undergraduate Students of Medicine Utilizing Cognitive Skills Ontology for Designing Personalized Learning Environments and Using Interactive Mobile Technologies to Develop Operating Room Technologies Competency are discussed in separate chapters Clinical Cases in

**Accountability in education: meeting our commitments** UNESCO, 2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with

a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover
