Dhawan, 2010 In First Angle Projection For the students of B E B Tech of Maharshi Dayanand University MDU Rohtak and Kurushetra University Kurushetra. *Engineering Drawing for Manufacture* Brian Griffiths, 2002-10-01 The processes of manufacture and assembly are based on the communication of engineering information via drawing. These drawings follow rules laid down in national and international standards. The organisation responsible for the international rules is the International Standards Organisation ISO. There are hundreds of ISO standards on engineering drawing because drawing is very complicated and accurate transfer of information must be guaranteed. The information contained in an engineering drawing is a legal specification which contractor and sub contractor agree to in a binding contract. The ISO standards are designed to be independent of any one language and thus much symbology is used to overcome any reliance on any language. Companies can only operate efficiently if they can guarantee the correct transmission of engineering design information for manufacturing and assembly. This book is a short introduction to the subject of engineering drawing for manufacture. It should be noted that standards are updated on a 5 year rolling programme and therefore students of engineering drawing need to be aware of the latest standards. This book is unique in that it introduces the subject of engineering drawing in the context of standards. *MEM09204A Produce Basic Engineering Detail drawings* Warren Blackadder, 2013-12-06 This unit of competency covers the skills and knowledge required to identify drawing requirements preparing engineering drawings and an engineering parts list and issuing the drawings. Drawings include 2 D drawings to Australian Standard AS 1100 101 1992 Technical drawing General principles. This unit is suitable for those working within a drafting work environment where most specifications required for the drawing are already determined. Specifications may be obtained from design information customer requirements sketches and preliminary layouts. Drawings will usually be carried out with the use of computer aided design CAD systems but may also be done manually. Drawings are produced to AS 1100 101 1992 Technical drawing General
