*The 1978 Economic Report of the President* United States. Congress. Joint Economic Committee, 1978      *Rehabilitation Record*, 1971      Rich Democracies Harold L. Wilensky, 2002-07-01 In this landmark work the culmination of 30 years of systematic comprehensive comparison of 19 rich democracies Wilensky answers two basic questions 1 What is distinctly modern about modern societies in what ways are they becoming alike 2 How do variations in types of political economy shape system performance He specifies similarities and differences in the structure and interplay of government political parties the mass media industry labor professions agriculture churches and voluntary associations He then demonstrates how differences in bargaining arrangements among these groups lead to contrasting policy profiles and patterns of taxing and spending which in turn explain a large number of outcomes economic performance political legitimacy equality job security safety and risk real health the reduction of poverty and environmental threats and the effectiveness and fairness of regulatory regimes Drawing on quantitative data and case studies covering the last 50 years and more than 400 interviews he conducted with top decision makers and advisors Wilensky provides a richly detailed account of the common social economic and labor problems modern governments confront and their contrasting styles of conflict resolution The result is new light on the likely paths of development of rich democracies as they become richer Assessing alternative theories Wilensky offers a powerful critique of such images of modern society as post industrial or high tech the information age or the alleged dominance of globalization Because he systematically compares all of the rich democracies with at least three million population Wilensky can specify what is truly exceptional about the United States what it shares with Britain and Britain abroad Canada Australia New Zealand and what it shares with all or almost all of the West European democracies Israel and Japan He gives careful attention to which successful social and labor policies are transferable across nations and

which are not Rich Democracies will interest both scholars and practitioners It combines the perspectives of political economy the interplay of markets and politics and political sociology the social bases of politics It will be especially useful in courses on comparative political economy comparative politics European politics public policy political sociology the welfare state American government advanced industrial societies and industrial relations Unemployment, Social Vulnerability, and Health in Europe Detlef Schwefel, Per-Gunnar Svensson, Herbert Zöllner, 2012-12-06 It is not easy to summarize the studies that have dealt with the health effects of unemployment on the unemployed The main problem impeding a comparison of their results is the diversity of theoretical constructs associated with physical and especially mental health and above all an apparently inexhaustible variety of operationalizations of these constructs It is significant that the six conclusions drawn from the present state of unemployment research by the organizers of a recent conference on the individual and social consequences of unemployment included the following request In view of the relevant constructs it seems to be most urgent to find or to develop operationalizations which can be agreed upon in order to guarantee comparability of research results Kieselbach and Wacker 1985 p XX my translation Nevertheless the results of these studies allow the statement that a negative influence of job loss on psychological well being can be regarded as a validated finding The influence on physical health however must be assessed very carefully and in a differentiated manner The few investigations dealing with this question arrive at different conclusions moreover possibly relieving effects of unemployment on health come into sight Worklife, 1977 **Collective Bargaining Agreements for State and County Government Employees** United States. Manpower Administration, 1962 *Manpower Research and Development Projects* United States. Department of Labor. Manpower Administration, 1971 Manpower Research and Development Projects, 1969 Men Out of Work M. J. Hill, R. M. Harrison, A. V. Sargeant, V. Talbot, 1973-08-09 This 1973 book reports the first findings of a study of over a thousand unemployed men living in Coventry Hammersmith and Newcastle upon Tyne in October 1971 It provides evidence on the main characteristics of these men and particularly upon the relations between these characteristics and length of unemployment In doing this the book looks at the evidence for those views of unemployment which attribute worklessness either to the inadequacies of individuals or to their reluctance to work It finds that the most significant characteristics of the long term unemployed are increasing age low skill and deficient health and concludes by relating these to the policies of the 1970s designed to assist men to get work Social Security Policies in Industrial Countries Margaret S. Gordon, 1988 After 25 years of expansion and liberalisation in the post war period social security policies in industrial countries have been encountering stresses and strains in the 1970s and 1980s in an environment of slower economic growth concern over inflation and high unemployment This has led to intensified

controversy between conservatives who blame economic instability on the generosity of the welfare state and liberals who defend the role of social security programmes in contributing to economic stability and preventing people from falling into poverty. The discussion focuses on questions such as the relative merits of earnings related income tested and universal benefits, who bears the financial burden and the impact of social security benefits on incentives to work. Among the controversial issues receiving considerable attention are the arguments over the persistence of high unemployment in Western Europe, the attacks on entitlements that benefit the middle class and the growing problem of disadvantaged youth especially in the ghetto areas of large cities in some of the Western European countries and in the United States.
