Skill Development For Engineers An Innovative Model For Advanced Learning In:

Skills Development for Engineers Kevin Hoag, 2001 While classroom learning is suited for conveying basic information to large numbers of people Hoag Engine Research Center U of Wisconsin at Madison argues that continuing education for engineers most often requires small groups of people to rapidly develop proficiencies He discusses the roles of upper management direct supervisors and individual engineers in his proposed model for continuing education in organizations After outlining the model he discusses applications related to rotational programs organizational assessment and program evaluation Annotation copyrighted by Book News Inc Portland OR *Learning Trajectories, Innovation and Identity for Professional Development* Anne Mc Kee, Michael Eraut, 2011-09-18 Educators in the professions have always had unique demands placed upon them These include the need to keep pace with rapidly evolving knowledge bases developing skills and attitudes appropriate to practice learning in the workplace and fostering public confidence For twenty years these new demands have created additional educational imperatives Public accountability has become more intensive and extensive Practitioners practice in climates more subject to scrutiny and less forgiving of error The contexts in which professionals practice and learn have changed and these changes involve global issues and problems Often professionals are the first responders who are required to take an active stance in defining and solving problems This book explores the pedagogic implications of these challenges internationally for a wide range of professions which include accountants military company commanders surgeons nurse practitioners academic managers community physicians and dentists The established view of professional development is about what the professional knows and can do The authors broaden this view to include the systemic and contextual factors that affect learning and the conditions necessary for effective practice and identity development across the professional lifespan Authors examine the unique particularities and requirements of diverse professional groups The editors emphasize new ideas and learning that emerges across the professions As readers use this book as a pathway to their own innovations in scholarship and pedagogic research they join their colleagues in supporting new directions in learning teaching and assessment across professions This book was awarded the Outstanding Research Publication award for 2012 by the American Educational Research Association's Division I Education in the Professions p Using the Engineering Literature Bonnie A. Osif, 2016-04-19 With the encroachment of the Internet into nearly all aspects of work and life it seems as though information is everywhere However there is information and then there is correct appropriate and timely information While we might love being able to turn to Wikipedia for encyclopedia like information or search Google for the thousands of links Workplace Learning in Teacher Education Olwen McNamara, Jean Murray, Marion Jones, 2013-11-19 This book explores teacher workplace learning from four different perspectives social policy international comparators multi professional stances perspectives and socio cultural theory First it considers the policy and practice context of professional learning in teacher education in England and the rest of the UK with particular reference

to professional masters level provision The importance of teachers and schools perceptions of improvement development and learning and the inherent tensions between individual school and government priorities is explored Second the book considers models of teacher workplace learning to be found in international research and practice to explore what perspective they can bring to understanding policy and practice relating to workplace learning in the UK Third it draws on cross professional analysis to get an intellectual and theoretical purchase on workplace learning by examining how insights from across the professions can provide us with useful perspectives on policy and practice The analysis draws particularly on insights from medicine and educational psychology Fourth the book cross fertilises research and practice across the field of education by drawing on insights from perspectives such as socio cultural and activity theory and situated learning cognition to discover what they can offer in analysing the theoretical and pedagogic underpinnings of teacher workplace learning In short the book offers a number of contexts for exploring how best to conceptualise and theorise learning in the workplace in order to generate evidence to inform policy and practice and facilitates the development of a more theoretically informed and robust model of workplace learning and teaching
