Everyday Mathematics for Parents The University of Chicago School Mathematics Project, 2017-07-10 The Everyday Mathematics EM program was developed by the University of Chicago School Mathematics Project UCSMP and is now used in more than 185 000 classrooms by almost three million students Its research based learning delivers the kinds of results that all school districts aspire to Yet despite that tremendous success EM often leaves parents perplexed Learning is accomplished not through rote memorization but by actually engaging in real life math tasks

The curriculum isn't linear but rather spirals back and forth weaving concepts in and out of lessons that build overall understanding and long term retention. It's no wonder that many parents have difficulty navigating this innovative mathematical and pedagogic terrain. Now help is here. Inspired by UCSMP's firsthand experiences with parents and teachers, *Everyday Mathematics for Parents* will equip parents with an understanding of EM and enable them to help their children with homework, the heart of the great parental adventure of ensuring that children become mathematically proficient. Featuring accessible explanations of the research-based philosophy and design of the program and insights into the strengths of EM, this little book provides the big picture information that parents need. Clear descriptions of how and why this approach is different are paired with illustrative tables that underscore the unique attributes of EM. Detailed guidance for assisting students with homework includes explanations of the key EM concepts that underlie each assignment. Resources for helping students practice math more at home also provide an understanding of the long term utility of EM. Easy to use yet jam packed with knowledge and helpful tips, *Everyday Mathematics for Parents* will become a pocket mentor to parents and teachers new to EM who are ready to step up and help children succeed. With this book in hand, you'll finally understand that while this may not be the way that you learned math, it's actually much better.

Improving Maths Pedagogy and Practice (IMPP)

Scale Denise Kingston, Iram Siraj, Judy Barrett, 2025-10-28. The Improving Maths Pedagogy and Practice (IMPP) scale is an innovative way of assessing and improving the quality and effectiveness of mathematics teaching in the first few years of primary or elementary schooling. It is informed by the evidence base of practice shown to improve children's outcomes and extensive professional development delivered by the authors. The IMPP supports both the how and what of teaching mathematics to young children, encourages positive dispositions towards maths, and addresses issues such as maths anxiety and disengagement. It focuses on teaching developmentally appropriate maths with understanding, using maths talk, child-friendly contexts, concrete, pictorial, and abstract representations to their best effect. This unique measurement scale supports the teaching of early mathematics in primary elementary schools using the evidence base of what works best to support fluency and mastery, teachers' content and pedagogical content knowledge of mathematics, including comprehensive sets of practical examples, quality improvement processes, and self-assessment of the mathematics taught in classrooms, children learning mathematics with understanding, which also supports their engagement, enjoyment, and achievements, researchers, auditors, and/or inspectors looking for a measure of mathematical quality and effectiveness in the classroom. The IMPP will help teachers and school leadership successfully develop their children's mathematical understanding, reasoning, and problem-solving. Educators can use the scale for self-evaluation of their own practice so they can build on what they already do well and improve where required. Leadership teams and mentors can use it to audit quality, support positive discussions, and set effective development targets. The scale is particularly useful when supporting children living with disadvantage and those with additional learning needs and maths anxiety.
