concepts yet provides enough depth for students who may have advanced knowledge The chapters are structured in five parts Background of the Field Defining the Problem Infrastructure Solving Problems and Practical Applications Driven by Fear Guenter B Risse,2015-12-30 From the late nineteenth century until the 1920s authorities required San Francisco s Pesthouse to segregate the diseased from the rest of the city Although the Pesthouse stood out of sight and largely out of mind it existed at a vital nexus of civic life where issues of medicine race class environment morality and citizenship entwined and played out Guenter B Risse places this forgotten institution within an emotional climate dominated by widespread public dread and disgust In Driven by Fear he analyzes the unique form of stigma generated by San Franciscans Emotional states like xenophobia and racism played a part Yet the phenomenon also included competing medical paradigms and unique economic needs that encouraged authorities to protect the city s reputation as a haven of health restoration As Risse argues public health history requires an understanding of irrational as well as rational motives To that end he delves into the spectrum of emotions that drove extreme measures like segregation and isolation and fed psychological ideological and pragmatic urges to scapegoat and stereotype victims particularly Chinese victims of smallpox leprosy plague and syphilis Filling a significant gap in contemporary scholarship Driven by Fear looks at the past to offer critical lessons for our age of bioterror threats and emerging infectious diseases **Vietnamese Traditional Medicine** C. Michele

Thompson,2015-06-30 While reshaping our understanding of the history and development of traditional Vietnamese medicine in the 19th and 20th centuries Michele Thompson s new book reaches across disciplines to open important perspectives in Vietnamese colonial and social history as well as our understanding of the Vietnamese language and writing systems Traditional Vietnamese medicine is generally understood as an import from the Chinese tradition Thompson s detailed historical and linguistic research restores agency and voice to practitioners of Vietnamese medicine showing how the adoption of Chinese and then Western ideas of medicine in the 19th and 20th centuries relied on indigenous Vietnamese concepts of health and the human body She mines medical manuscripts in Chinese and in Nom vernacular Vietnamese to capture various aspects of the historical interaction between Chinese and Vietnamese thought She presents a detailed analysis of the Vietnamese response to a Chinese medical technique for preventing smallpox and to the medical concepts associated with it looking at Vietnamese healers from a variety of social classes Thompson s account brings together colorful historical vignettes contemporary observations and interviews and textual analysis It stands out as a demonstration of the power of the history of medicine to illuminate adjacent fields of enquiry It will be of interest to historians of medicine globally and in East Asia as well as to students of Vietnam and its complex process of modernization *Emerging Infectious Diseases*

,2015-07 **Law and Class in America** Paul Carrington,Trina Jones,2006-06 In Law and Class in America a group of leading legal scholars reflect on the state of the law from the end of the Cold War to the present grappling with a central question posed to them by Paul D Carrington and Trina Jones have recent legal reforms exacerbated class differences in

America In a substantive introduction Carrington and Jones assert that legal changes from the late 20th century onward have been increasingly elitist and unconcerned with the lives of poor people having little access to the legal system Contributors use this position as a springboard to review developments in their own particular fields and to assess whether or not legal decisions and processes have contributed to a widening gap between privileged and unprivileged people in this country From antitrust and bankruptcy to tax and election law the essays in this unique volume invite readers to reflect thoughtfully on socio economic justice in the new century and suggest that a lack of progressive reform in all areas of law may herald a form of undiagnosed class dominance reminiscent of America s Gilded Age Contributors Margaret A Berger M Gregg Bloche David L Callies Paul D Carrington Paul Y K Castle Lance Compa James D Cox Paula A Franzese Marc Galanter Julius G Getman Lawrence O Gostin Joel F Handler Trina Jones Thomas E Kauper Sanford Levinson John Linehan Joseph D McNamara Burt Neuborne Jeffrey O Connell Judith Resnik Richard L Schmalbeck Danielle Sarah Seiden Richard E Speidel Gerald Torres David M Trubek Elizabeth Warren and Lawrence A Zelenak

Smith III, 2014-09-19 Biological weapons have threatened U S national security since at least World War II Historically however the U S military has neglected research development acquisition and doctrine for biodefense Following September 11 and the anthrax letters of 2001 the United States started spending billions of dollars per year on medical countermeasures and biological detection systems But most of this funding now comes from the Department of Health and Human Services rather than the Department of Defense Why has the U S military neglected biodefense and allowed civilian organizations to take the lead in defending the country against biological attacks In American Biodefense Frank L Smith III addresses this puzzling and largely untold story about science technology and national security Smith argues that organizational frames and stereotypes have caused both military neglect and the rise of civilian biodefense In the armed services influential ideas about kinetic warfare have undermined defense against biological warfare The influence of these ideas on science and technology challenges the conventional wisdom that national security policy is driven by threats or bureaucratic interests Given the ideas at work inside the U S
