Israel Oliver King,Danny Hunter,M.S. Swaminathan,2021-09-22 Orphan Crops for Sustainable Food and Nutrition Security discusses the issues challenges needs and opportunities related to the promotion of orphan crops known also as neglected and underutilized species NUS The book is structured into six parts covering the following themes introduction to NUS approaches methods and tools for the use enhancement of NUS integrated conservation and use of minor millets nutritional and food security roles of minor millets stakeholders and global champions and building an enabling environment Presenting a number of case studies at the regional and country levels the chapters cover different but highly interlinked aspects along the value chains from acquisition and characterization of genetic diversity cultivation and harvesting to value addition marketing consumption and policy for mainstreaming Cross cutting issues like gender capacity building and empowerment of vulnerable groups are also addressed by authors Representatives from communities research for development agencies and the private sector also share their reflections on the needs for the use enhancement of NUS from their own perspectives This book will be of great interest to students and scholars of food security sustainable agriculture nutrition and health and development as well as practitioners and policymakers involved in building more resilient food and production systems **Nanotechnology in Intelligent Food Packaging** Annu,Tanima Bhattacharya,Shakeel Ahmed,2022-07-06 NANOTECHNOLOGY IN INTELLIGENT FOOD PACKAGING This book is a state of the art exposition of nanotechnology and food packaging which is undergoing rapid advancement This book is specially designed with an emphasis on the state of the art in nanotechnology and food packaging It offers fascinating techniques for producing smart and active food packaging and also discusses its toxicity and the role that nanosensors play in detecting different pathogens in food packaging The concluding chapters also explain recent developments concerning the incorporation of health supplements in food packaging and their future role in producing intelligent food packaging The 16 chapters of this book were contributed by academic and industry experts working in their respective areas of research and

are thoughtfully arranged in a systematic fashion that preserves the flow of knowledge. An attempt has been made to include all the information in a single monograph to better understand the topics and technologies involved in the application of nanotechnology in intelligent food packaging. Audience: The book is aimed at researchers, industry scientists such as chemists, biologists, polymer technologists, food packaging industrialists, biotechnologists, health experts, quality food safety officials, and policymakers. It will also be helpful to graduate students in the fields of materials science, polymer science, and biotechnology to better understand the fundamental concepts involved in food packaging in relation to extending shelf life.

Interdisciplinary Technological Advancements in Smart Cities Arij Naser Abougrien, Shilpa Mehta, Cristina Costa, 2024-12-19. This book explores interdisciplinary technological advancements in smart cities. The book begins with a comprehensive study of smart cities followed by their benefits and shortcomings. The authors show how, with the help of digital technology, cities are becoming more sustainable and efficient, leading to a better quality of life. The book includes a comprehensive review of literature, research works, and case studies which are presented to demonstrate how various technologies can be integrated into smart cities. The book includes scenarios in smart agriculture, smart transportation, smart healthcare, and more. This book also offers researchers, students, academicians, and professionals working in this field an extensive range of smart city applications.

Hidden Hunger and the Transformation of Food Systems Hans Konrad Biesalski, 2020-10-06. Hidden hunger is not about providing enough calories; it is about a lack of micronutrients which has long consequences for the children who are mostly affected. This begins with physical and cognitive developmental disorders and continues with an increased risk of non-communicable diseases and the occurrence of obesity. The book compiles the contributions of the Fourth Congress on Hidden Hunger 2019 as original articles. The focus of the congress was the problem of malnutrition and overweight which can coexist and is termed a double burden. Part of the book deals with the causes of malnutrition and the challenge of achieving an agricultural system that is more focused on food quality. Another part discusses the causes and intervention approaches to tackling childhood obesity, especially in connection with malnutrition. All in all, this publication is a summary of important work by highly renowned authors on the topic of the congress. **Hidden Hunger and the Transformation of Food Systems: How to Combat the Double Burden of Malnutrition**. Like its two predecessors, the book fills an important gap by summarizing the essential aspects for science, applied research, and politics at a high level.

Food Science and Technology Oluwatosin Ademola Ijabadeniyi, 2023-11-06. Food Science and Technology: Fundamentals and Innovation presents the aspects of microbiology, chemistry, nutrition, and process engineering required for the successful selection, preservation, processing, packaging, and distribution of quality food. It is a valuable resource for researchers and students in food science, technology, and food industry professionals and entrepreneurs. There are two new chapters in the 2nd Ed: COVID-19 and food supply chain, as well as climate-smart food science.

Bio- and Nano-sensing Technologies for Food Processing and Packaging Ashutosh Kumar Shukla, 2022-10-19. The importance of processing and

packaging food items so that they are safe for the consumer cannot be underestimated. Sensors have an important role to play in this and sensing technologies have attracted the attention of the scientific community in view of increasing environmental and societal concerns. This edited volume presents a collection of ten chapters discussing the current trends of bio and nano sensing technologies for processing and packaging of food items. Starting with an overview chapter which introduces the field, the book goes on to discuss novel applications related to preservation, authenticity and safety of foods. Intelligent food packaging and nano based sensing are covered and the book finishes with a look towards the pros and cons of how this will revolutionise sensing throughout the food sector. It will be of benefit to scientists and practising professionals conducting research in the areas of food processing, contamination and food safety and academic researchers and graduate students studying food technology or food engineering.

Food Safety and Human Health Ram Lakhan Singh, Sukanta Mondal, 2019-07-30. Despite advances in hygiene, food treatment and food processing, diseases caused by foodborne pathogens continue to constitute a worldwide public health concern. Ensuring food safety to protect public health remains a significant challenge in both developing and developed nations. Food Safety and Human Health provides a framework to manage food safety risks and assure a safe food system. Political, economic and ecological changes have led to the re-emergence of many foodborne pathogens. The globalization of food markets, for example, has increased the challenge to manage the microbial risks. This reference will help to identify potential new approaches in the development of new microbiologically safe foods that will aid in preventing food borne illness outbreaks and provides the basic principles of food toxicology, food processing and food safety. Food Safety and Human Health is an essential resource to help students, researchers and industry professionals understand and address day to day problems regarding food contamination and safety. Encompasses the first pedagogic treatment of the entire range of toxic compounds found naturally in foods or introduced by industrial contamination. Identifies areas of vital concern to consumers such as toxicological implications of food and human health implications of food processing. Focuses on safety aspects of genetically modified foods and the range of processing techniques along with the important food safety laws.

Application of Nanotechnology in Food Science, Processing and Packaging Chukwuebuka Egbuna, Jaison Jeevanandam, Kingsley C. Patrick-Iwuanyanwu, Eugene N. Onyeike, 2022-05-03. This book entitled Application of Nanotechnology in Food Science Processing and Packaging presents up to date information on the emerging roles of nanotechnology in food industry, its fundamental concepts, techniques and applications. The application of nanotechnology in the food industry is an emerging area which has found tremendous use in improving food quality through the enhancement of food taste, texture, colour and flavour. Also, its application has improved the bioavailability and target delivery of certain bioactive food ingredients through controlled release of nutrients, a feature that is impossible with the conventional methods of food processing. The application of nanotechnology in food packaging for the detection of contaminants, pathogens, biotoxins and pesticides through nanosensor safety evaluations has led to the increase in shelf life of

products and quality assurance through the detection and monitoring of toxins This book taps from the experience of subject experts from key institutions around the world The users of this book will benefit greatly as the chapters were simplified and arranged carefully to aid proper understanding consistency and continuity *Internet of Things in the Food Industry* Anna Rogala, Renata Nestorowicz, Ewa Jerzyk, 2024-04-02 The food industry is experiencing a digital transformation across the entire supply chain from farm to fork This book offers comprehensive insights into the challenges and opportunities faced specifically examining the application of the Internet of Things The authors analyse the benefits and the related threats from the perspective of the participants of the entire supply chain including consumers Taking the reader on a journey this book begins with an analysis of technology use in farming production logistics and retailing before delving into the use of digitalization in educating consumers on sustainable consumption practices The multifaceted analysis of the Internet of Food potential combines science and practice enriching theoretical analysis with case studies This book will be of interest to those researching and studying supply chain management logistics innovation and technology management and consumption with a particular interest in the food industry Sensor Technologies for Food Quality and Safety Ashish Kapoor, Anandhakumar Sundaramurthy, 2025-06-02 The multidisciplinary field of food sensor development is evolving rapidly Prompt detection of food contaminants is vital for public health protection Significant advances are taking place in the design and development of sensitive affordable and user friendly sensors for food safety and security This book covers various recent advances in food sensor development using illustrative descriptions of successful practical applications as well as identifying existing challenges and prospects Compiling current progress in food quality sensors such as electrochemical sensors nanocomposite sensors aptamer based immunosensors and microfluidic lab on a chip devices it fills a gap in the literature by laying down a framework for food sensor development from idea to implementation With an emphasis on multidisciplinary aspects the book appeals to students academics researchers and industry personnel from diverse backgrounds with an interest in food science and food quality assurance *HCI International 2016 - Posters' Extended Abstracts* Constantine Stephanidis, 2016-07-04 This is the second volume of the two volume set CCIS 617 and CCIS 618 that contains extended abstracts of the posters presented during the 18th International Conference on Human Computer Interaction HCII 2016 held in Toronto Canada in July 2016 The total of 1287 papers and 186 posters presented at the HCII 2016 conferences was carefully reviewed and selected from 4354 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers thoroughly cover the entire field of Human Computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The papers included in this volume are organized in the following topical sections web social media and communities gesture and motion based interaction expressions and emotions recognition and psychophysiological monitoring technologies for learning and creativity health applications location based and navigation applications smart environments and the Internet of Things design and
