*The Biotechnologists* Stephanie Jones, 1991-12-12 In *The Biotechnologists* a series of outstanding biotechnology entrepreneurs from the USA the UK and continental Europe tell their own stories of how they played a part in the evolution of the biotechnology companies they founded and or now run The book also looks at the role of venture capital and other forms of financing through their key stages of growth A detailed introduction outlines the emergence of the biotech boom and its progress to date A glossary explains scientific terms

*The Biotechnology Debate* Bernice Bovenkerk, 2012-01-05 This book grounds deliberative democratic theory in a more refined understanding of deliberative practice in particular when dealing with intractable moral disagreement regarding novel technologies While there is an ongoing vibrant debate about the theoretical merits of deliberative democracy on the one hand and more recently empirical studies of specific deliberative exercises have been carried out these two discussions fail to speak to one another Debates about animal and plant biotechnology are examined as a paradigmatic case for intractable disagreement in today's pluralistic societies This examination reveals that the disagreements in this debate are multi faceted and multi dimensional and can often be traced to fundamental disagreements about values or worldviews One of the acute insights to emerge from this examination is that deliberation can serve different purposes vis vis different types of problem In the case of deeply unstructured problems like the modern biotechnology debate the aim of inclusion is more appropriate than the aim of consensus This book highlights the importance of political culture and broader institutional settings in shaping the capacity and propensity of citizens to engage in deliberation and the degree to which governments are prepared to relinquish authority to deliberative mini publics Robyn Eckersley University of Melbourne Australia
