**The Black Man** James Morris Webb, 1910 The Bible gives the first and only true account of the origin of mankind It is the only book containing an accurate record of the progress of man toward civilization and it is the indispensable reference of all searchers after the real facts of the birth of humanity and its progress toward the civilization of today beginning with his creation it is the only authentic record of man authentic because it is first hand not a copy of something else or a scientific or literary review but a dispassionate record of man s creation and progress untrimmed unshaped and unvarnished to suit prejudice It would not be a complete record if it did not show with the rest of them the origin of the black man and Woe for all these pinnacle thieves it shows that he the black man is the father of civilization The black man has been misrepresented by prejudiced historians and lecturers It has been and is now quoted that Ham the father of the black man was cursed by his father Noah Now in regard to this incident let us take the Biblical record for it and anyone not totally blind with prejudice will be convinced by reading in the Book of Genesis the 9th Chapter from the 20th to the 27th verse inclusive that Noah did not for he could not curse Ham although he did in a fit of intoxication pronounce a curse on Canaan the son of Ham

valuable book     *Philosophy of Religion and the African American Experience* John H. McClendon III, 2017-07-03 Most white philosophers of religion generally presume that philosophy of religion is based on what is a false universality whereby the white Western experience is paradigmatic of humanity at large The fact remains that Howard Thurman James H Cone and William R Jones among others have produced a substantial amount of theological work quite worthy of consideration by philosophers of religion Yet this corpus of thought is not reflected in the scholarly literature that constitutes the main body of philosophy of religion Neglect and ignorance of African American Studies is widespread in the academy By including chapters on Thurman Cone and Jones the present book functions as a corrective to this scholarly lacuna     **The Black Man (Annotated)** James Morris Webb, 2019-09-03 In his profoundly influential work James Morris Webb argues that the black man was the father of civilization born in the land of Egypt and that the different branches of science and art were simply transmitted to other races which as the ages have rolled by have only been enlarged and to some extent improved upon A seminal text *The Black Man* was widely read within the Garvey Movement the Rastafarians and other early African identity and Black Nationalist groups
