Facing Black Star Thierry Gervais, Vincent Lavoie, 2023-06-13 The Black Star Collection at The Image Centre the expectations challenges and results of a decade of research in a key photo agency's print collection In 2005 Toronto Metropolitan formerly Ryerson University TMU acquired the massive collection Black Star Collection of the photo agency previously based in New York City nearly 292 000 black and white prints Preserved at The Image Centre at TMU the images include iconic stills of the American Civil Rights movement by Charles Moore among thousands of ordinary photographs that were classified by theme in the

agency's picture library. While the move of the collection from a corporate photo agency to a public cultural institution enables more access, researchers must still face the size of the collection, its structural organization, the materiality of the prints, and the lack of ephemera. Facing Black Star aims to fruitfully highlight this tension between research expectations and challenges. Coeditors Thierry Gervais and Vincent Lavoie have gathered local, national, and international researchers ranging from graduate students to established scholars and curators to illuminate the staggering range of the collection, from its disquieting record of the Nazis' rise to power to its visual archive of climate change. Each contribution highlights methodological, epistemological, and political issues inherent to conducting research in photographic archives and collections, such as indexing protocols and their impact on research, the photographic archive as a place of visibility and invisibility, and the photographic archive as a hermeneutic tool. Shedding new light on current issues in the theory and history of photography, this impressive volume containing 100 images will not only discuss the subjects portrayed in the photographs but will also address the history of photojournalism, the role of such a photographic archive in our Western societies, and ultimately photography as a medium. Like the other volumes of the RIC Books series, MIT Press/The Image Centre (formerly the Ryerson Image Centre), this publication will appeal as much to academics of visual history as it will to photography enthusiasts in general.

The Nazi Card Brian Johnson, 2017-01-25. The Cold War began almost immediately after the end of World War II and the defeat of the Nazis in Europe. As images of the Nazis' atrocities became part of American culture's common store, the evil of their old enemy beyond the Nazis as a wartime opponent became increasingly important. As America tried to describe the danger represented by the spread of Communism, it fell back on descriptions of Nazism to make the threat plain through comparison. At the heart of the tensions of that era lay the inconsistency of using one kind of evil to describe another. The book addresses this tension in regards to McCarthyism, campaigns to educate the public about Communism, attempts to raise support for wars in Asia, and the rhetoric of civil rights. Each of these political arenas is examined through their use of Nazi analogies in popular political and literary culture. *The Nazi Card* is an invaluable look at the way comparisons to Nazis are used in American culture, the history of those comparisons, and the repercussions of establishing a political definition of evil.

Stalinism and Nazism Henry Rousso, Richard Joseph Golsan, 2004-01-01. In this volume, Europe's leading modern historians offer new insights into two totalitarian regimes of the twentieth century that have profoundly affected world history: Nazi Germany and the Stalinist Soviet Union. Until now, historians have paid more attention to the similarities between these two regimes than to their differences. *Stalinism and Nazism* explores the difficult relationship between the history and memory of the traumas inflicted by Nazi and Soviet occupation in several Eastern European countries in the twentieth century. The first part of the volume explores the origins, nature, and organization of Hitler's and Stalin's dictatorial power, the manipulation of violence by the state systems, and the

comparative power of the dictator's personal will and the encompassing totalitarian system. The second part examines the legacies of the Nazi and Stalinist regimes in Eastern European countries that experienced both Stalinism and Nazism. It features the latest critical perspectives on two of the most influential and deadly political regimes in modern history.
