The Blakemore Touch Diana C. Reep, 1988 The Oxford Handbook of Synesthesia Julia Simner, Edward M.

Hubbard, 2018-10-23 Synesthesia is a fascinating phenomenon which has captured the imagination of scientists and artists alike This title brings together a broad body of knowledge about this condition into one definitive state of the art handbook

The Hand, an Organ of the Mind Zdravko Radman, 2013-05-10 Theoretical and empirical accounts of the interconnectedness between the manual and the mental suggest that the hand can be understood as a cognitive instrument Cartesian inspired dualism enforces a theoretical distinction between the motor and the cognitive and locates the mental exclusively in the head This collection focusing on the hand challenges this dichotomy offering theoretical and empirical perspectives on the interconnectedness and interdependence of the manual and mental The contributors explore the possibility that the hand far from being the merely mechanical executor of preconceived mental plans possesses its own know how enabling enhanced beings to navigate the natural social and cultural world without engaging propositional thought consciousness and deliberation The contributors consider not only broad philosophical questions ranging from the nature of embodiment enaction and the extended mind to the phenomenology of agency but also such specific issues as touching grasping gesturing sociality and simulation They show that the capacities of the hand include perception on its own and in association with other modalities action extended cognition social interaction and communication Taken together their accounts offer a handbook of cutting edge research exploring the ways that the manual shapes and reshapes the mental and creates conditions for embodied agents to act in the world Contributors Matteo Baccarini Andrew J Bremner Massimiliano L Cappuccio Andy Clark Jonathan Cole Dorothy Cowie Natalie Depraz Rosalyn Driscoll Harry Farmer Shaun Gallagher Nicholas P Holmes Daniel D Hutto Angelo Maravita Filip Mattens Richard Menary Jesse J Prinz Zdravko Radman Matthew Ratcliffe Etienne B Roesch Stephen V Shepherd Susan A J Stuart Manos Tsakiris Michael Wheeler **Embodied Communication**

Nutt, 2011-04-05 On a sunny fall afternoon in 1988 Jon Sarkin was playing golf when without a whisper of warning his life changed forever As he bent down to pick up his golf ball something strange and massive happened inside his head part of his brain seemed to unhinge to split apart and float away For an utterly inexplicable reason a tiny blood vessel thin as a thread deep inside the folds of his gray matter had suddenly shifted ever so slightly rubbing up against his acoustic nerve Any noise now caused him excruciating pain After months of seeking treatment to no avail in desperation Sarkin resorted to radical deep brain surgery which seemed to go well until during recovery his brain began to bleed and he suffered a major stroke

When he awoke he was a different man Before the stroke he was a calm disciplined chiropractor a happily married husband and father of a newborn son Now he was transformed into a volatile and wildly exuberant obsessive seized by a manic desire to create art devoting virtually all his waking hours to furiously drawing painting and writing poems and letters to himself strangely detached from his wife and child and unable to return to his normal working life His sense of self had been shattered his intellect intact but his way of being drastically altered His art became a relentless quest for the right words and pictures to unlock the secrets of how to live this strange new life And what was even stranger was that he remembered his former self In a beautifully crafted narrative award winning journalist and Pulitzer Prize finalist Amy Ellis Nutt interweaves Sarkin s remarkable story with a fascinating tour of the history of and latest findings in neuroscience and evolution that illuminate how the brain produces from its web of billions of neurons and chaos of liquid electrical pulses the richness of human experience that makes us who we are Nutt brings vividly to life pivotal moments of discovery in neuroscience from the shocking rebirth of a young girl hanged in 1650 to the first autopsy of an autistic savant s brain and the extraordinary true stories of people whose personalities and cognitive abilities were dramatically altered by brain trauma often in shocking ways Probing recent revelations about the workings of creativity in the brain and the role of art in the evolution of human intelligence she reveals how Jon Sarkin s obsessive need to create mirrors the earliest function of art in the brain Introducing major findings about how our sense of self transcends the bounds of our own bodies she explores how it is that the brain generates an individual self and how if damage to our brains can so alter who we are we can nonetheless be said to have a soul For Jon Sarkin with his personality and sense of self permanently altered making art became his bridge back to life a means of reassembling from the shards of his former self a new man who could rejoin his family and fashion a viable life He is now an acclaimed artist who exhibits at some of the country s most prestigious venues as well as a devoted husband to his wife Kim and father to their three children At once wrenching and inspiring this is a story of the remarkable human capacity to overcome the most daunting obstacles and of the extraordinary workings of the human mind
