The Blind Spot:

The Blind Spot (illustrated) Homer Eon Flint, 2021-08-21 On a certain foggy morning in September 1905 a tall man wearing a black overcoat and bearing in one hand a small satchel of dark reddish leather descended from a Geary Street tram at the foot of Market Street San Francisco It was a damp morning a mist was brooding over the city blurring all distinctness The man glanced about him a tall man of trim lines and distinctness and a quick decided step and bearing In the shuffle of descending passengers he was outstanding with a certain inborn grace that without the blood will never come from training Men noticed and women out of instinct cast curious furtive glances and then turned away which was natural inasmuch as the man was plainly old But for all that many ventured a second glance and wondered **The Blind Spot**

evil the laughter of boys is wholehearted It was merely that things were not exactly as they should be it was not natural that age should be so youthful The fates were playing and in this case for once in the world s history their play was crosswise

The Blind Spot Austin Hall Homer Eon Flint,2021-10-10 Book Excerpt A nasty morning repeated the officer Ah Er yes did you say it was a nasty morning Indeed I do not know sir However it is very interesting Stranger in San Francisco Well yes At least I have never seen it H m The detective was a bit nonplussed by the man s evident evasion Well if you are a stranger I suppose it is up to me to come to the defence of my city This is one of Frisco s fogs We have them occasionally Sometimes they last for days This one is a low one It will lift presently Then you will see the sun Have you ever seen Frisco s sun My dear sir this same slow articulation I have never seen your sun nor any other Hum It was an answer altogether unexpected Again the officer found himself gazing into the strange refined face and wonderful eyes The man was not blind of that he was certain Neither was his voice harsh or testy Rather was it soft and polite of one merely stating a fact Yet how could it be He remembered the cig Read More

The Blind Spot Adam Frank,Marcelo Gleiser,Evan Thompson,2024-03-05 A compelling argument for including the human perspective within science and for how human experience makes science possible This is by far the best book I ve read this year Michael Pollan Professor of the Practice of Non fiction Harvard University 1 New York Times bestselling author A stimulating manifesto for changing the way we look at things Wall Street Journal It s tempting to think that science gives us a God s eye view of reality But we neglect the place of human experience at our peril In *The Blind Spot* astrophysicist Adam Frank theoretical physicist Marcelo Gleiser and philosopher Evan Thompson call for a revolutionary scientific worldview where science includes rather than ignores or tries not to see humanity s lived experience as an inescapable part of our search for objective truth The authors present science not as discovering an absolute reality but rather as a highly refined constantly evolving form of human experience They urge practitioners to reframe how science works for the sake of our future in the face of the planetary climate crisis and increasing science denialism Since the dawn of the Enlightenment humanity has looked to science to tell us who we are where we come from and where we re going but we ve gotten stuck thinking we can know the universe from outside our position in it When we try to understand reality only through external physical things imagined from this outside position we lose sight of the necessity of experience This is the Blind Spot which the authors show lies behind our scientific conundrums about time and the origin of the universe quantum physics life AI and the mind consciousness and Earth as a planetary system The authors propose an alternative vision scientific knowledge is a self correcting narrative made from the world and our experience of it evolving together To finally see the Blind Spot is to awaken from a delusion of absolute knowledge and to see how reality and experience intertwine The Blind Spot goes where no science book goes urging us to create a new scientific culture that views ourselves both as an expression of nature and as a source of nature s self understanding so that humanity can flourish in the new millennium

Meeting, 1993 *A Behaviorist Looks at Form Recognition* William R. Uttal, 2014-04-04 For many years behaviorism was criticized because it rejected the study of perception This rejection was based on the extreme view that percepts were internal subjective experiences and thus not subject to examination This book argues that this logic is incorrect and shows how visual perception particularized in the study of form recognition can be carried out from the behavioral point of view if certain constraints and limitations are understood and accepted The book discusses the idea of representation of forms considers the major historical neural psychological and computational theories of form recognition and then concludes by presenting a modern approach to the problem In this book William Uttal continues his critical analysis of the foundations of modern psychology He is particularly concerned with the logical and conceptual foundations of visual perception and uses form recognition as a vehicle to

rationalize the discrepancies between classic behaviorism and what we now appreciate are legitimate research areas
