The Boundary Land And Sea Land And Sea:

Adapting to Sea Level Rise in the Coastal Zone Chad J. McGuire, 2017-09-25 For as long as humans have been inhabiting coastal areas and recording what occurs in their environments coastal zones have been defined through dynamic interactions And this is further underlined by a more recent development observed sea level rise In a thorough but not overly technical approach Adapting to Sea Level Rise in the Coastal Zone Law and Policy Considerations provides a legal policy framework for facing the challenges of sea level rise The book includes an analysis of sea level rise adaptation strategies that examines the legal impacts of coastal land use decisions based on the current interpretation of private property rights in relation to public control over those rights The author discusses the science behind sea level rise and highlights policy complexities and options He then presents an overview of related legalities and bringing it all together applies the principles offered in the book concluding with strategies and solutions and a perspective on the future If we accept the premise that sea level rise is occurring and will continue for the foreseeable future then we must begin to consider policy responses to this risk in coastal regions Part of any pragmatic policy response must include a review of the options available to public institutions when developing and implementing rational adaptation policies This book offers practical legal policy approaches to sea level rise adaptation that promotes sound planning in the face of climate change and rising seas *The Boundary: Land and Sea* Roger A. Radar Propagation and Scattering in a Complex Maritime Environment Christophe Bourlier, 2018-07-24

Radar Propagation and Scattering in a Complex Maritime Environment addresses advanced numerical techniques used to significantly reduce the complexity and memory requirement for solving the linear system that results from the discretization of the boundary integral equations by the Method of Moments MoM Typically the problem of the VHF wave scattering from an object above a rough sea surface in a ducting environment is investigated as is the HF radar propagation above the Earth in the presence of islands Along with these topics the book also covers rapid asymptotic theories

which are derived and compared with references methods based on the MoM Presents tactics on scattering from both rough surfaces and near a rough surface Discusses radar propagation in ducting environments Includes numerical techniques to accelerate MoM
