## **The Big Dig Archaeology And The Jubilee Line Extension:**

**Jubilee Line Extension** Bob Mitchell, 2003 This major reference work details the story of London Underground's award winning Jubilee Line Extension JLE how it came to being how it was planned how it was designed built and commissioned and how the millennium deadline imposed by the Dome was met Always in the public eye and the political spotlight the JLE has played a significant role in the success of the Canary Wharf development improved public transport immeasurably in the areas of southeast and east London and set new standards for London Underground and public transport Despite the problems and the much publicised cost and time overruns the project can still be considered to be a major construction achievement The Jubilee Line Extension From Concept to Completion describes in detail the history of the project which goes back more than 50 years The first concepts were defined in 1943 and the book traces developments to the East London Railway study that effectively defined the JLE Extension Also presented is a detailed insight into the development of the Olympia York funding contribution that was a key issue in achieving Government approval With contributions from some of the major contractors personnel involved the book offers a detailed and factual account of the completion of this stunning new railway line Much has been written about the construction work of the JLE particularly the stations however this is the first book that provides a rounded view of how a major new underground railway line came to be built and presents key details of the JLE project activities relating to transport planning the legal processes comprehensive safety planning procurement contracting engineering development environmental issues project management and commissioning And all achieved under immense political and media scrutiny The Jubilee Line Extension From Concept to Completion will appeal to everyone who is interested in major transportation projects and in discovering how the JLE was able to deliver a major urban infrastructure project with the minimum of environmental disturbance and with an exemplary safety record Project managers will find this detailed record of all that was involved an inspiration and an invaluable source of information which they can apply to other projects they are working on now and in the future The Big Dig Museum of London. Archaeology Service, 1998 The Jubilee Line extension runs through Westminster and north Southwark traversing some of the most archaeologically sensitive areas of London The tunnels themselves are so deep that they pass well below any archaeological remains but there have to be a myriad of holes connecting the tunnels with the surface This booklet accompanied by colour photographs gives a basic outline of the archaeological remains uncovered during the construction work from prehistoric tools to a medieval abbey The Railways of London Docklands Jonathan Willis, 2022-09-15 This book provides a comprehensive study of the planning and building of railways in London's Docklands reflecting on the past 180 years of railway development It describes the creation of the enclosed working docks at the start of the 19th Century and the introduction of railways in the middle of the century By the 1970s the decline of the working docks led to a plethora of plans to regenerate the area but with little agreement on what should be done The setting up of the London Docklands

Development Corporation by the former Secretary of State for the Environment Lord Heseltine was a significant landmark expediting the Canary Wharf development The book describes in detail the modern railway projects created to support the subsequent growing employment and population of the area including the Docklands Light Railway with its multiple extensions the Jubilee Line extension and Crossrail Elizabeth Line The book will appeal to a wide audience To railway enthusiasts who wish to learn more about the why and the how such projects are approved and built and to transport and planning professionals who wish to understand more about the ups and downs of the relationship between transport and development and the decision making processes within changing political economic and employment scenarios The end result has provided Docklands with a comprehensive hierarchy of quality transport services to match anyway in the world

*The Goddess and the Bull* Michael Balter, 2016-06-16 Veteran science writer Michael Balter skillfully weaves together many threads in this fascinating book about one of archaeology's most legendary sites atalhyk First excavated forty years ago the site is justly revered by prehistorians art historians and New Age goddess worshippers alike for its spectacular finds dating almost 10 000 years ago Archaeological maverick Ian Hodder leader of the recent re excavation at this Turkish mound designated Balter as the project's biographer The result is a skillful telling of many stories about both past and present of the inhabitants of Neolithic atalhyk and the development of human creativity and ingenuity as revealed in the recent excavation of James Mellaart the original excavator whose troubles off the mound eventually overshadowed his incisive work at the site of Hodder and his intense brilliant crew who marveled and squabbled over the meaning of finds in dusty trenches while attempting to reinterpret Mellaart's work and of the recent history of the theory and methods of archaeology itself Part story of the human past part soap opera of modern scholarly life part textbook on the practice of modern archaeology this book should appeal to general readers and archaeological students alike
