Lemza,2021-09-29 Capitalizing on thousands of feet of accumulated footage captured by combat camera crews during the early years of the Korean War a small group of US Army officers conceptualized a film series that would widen viewers understanding of the service and its mission Their efforts produced the documentary television series that in late 1951 would become The Big Picture Although it would take years to fully utilize the emerging technologies and develop the concept into a popularly recognized television series The Big Picture did evolve into a vehicle whose intention was to help the army tell its story sell its relevance in the emerging Cold War and inform and educate its audience about American ideals Its messages captured the early post 1945 zeitgeist and reflected a national mood that was anticommunist steeped in foundational principles of American exceptionalism and trusting of elite leadership John W. Lemza's The Big Picture argues that the show like others produced for television during that time by the armed forces served as a vehicle for directed propaganda scripted to send important Cold War messages to both those in uniform and the American public In this first systematic study of its production and reception history as well as its themes and cultural impact

Lemza shows how the producers incorporated specific Cold War themes such as anticommunism into episodes and deployed television's small screen as the intersection of propaganda and policy during the Cold War period John Lemza's study reveals that the longer *The Big Picture* maintained those themes the more they began to lose their resonance especially when the cultural and social environment of the United States began changing in the mid 1960s The series producers chose to continue on a course that was set during the early Cold War years and the credibility of the show began to suffer Throughout the course of its two decade production run however *The Big Picture* cast a big shadow as the premier military program influencing viewing audiences through primetime television and syndication

**Big Picture, Small Screen** John Hill, Martin McLoone, 1996 This work features contributions from academics and media professionals who ask what is the history of involvement between film and television in the US Europe Britain and Ireland what are the sources of television finance for film and what are the consequences for the type of film made
