Big Years, Biggest States Lynn E. Barber, 2020-04-30 Undertaking a Big Year requires a more extreme version of planning than what is needed to bird in a typical year In a Big Year a birder is trying to see or hear new birds every day day after day throughout the whole year The first woman to complete a North American Big Year continental United States and Canada and identify over 700 species Lynn E Barber clocked more than 175 000 miles and ticked off a then record setting 723 species over twelve months in 2008 Yet even as an anomaly a female birder in the then male dominated world of competitive birding she took the initiative to reimagine the whole idea of a Big Year in the two biggest states in the country At home in both Texas and Alaska Barber offers an inside look into how to plan execute and thoroughly enjoy a year of finding the birds that inhabit two of the nation s most diverse landscapes The drastic differences between the climate geography plant life and habitat at the far northern and southern edges of the US mainland mean seeing a distinct number of birds in each state that are not found in the other Yet as states with both coastal and international boundaries Texas and Alaska provide countless opportunities to see the most seasonally varied far flying and specifically adapted birds in the world As Barber chronicles her travels throughout the Texan and Alaskan landscapes serious and casual birders alike will appreciate her lively and informative prose and commitment to her distinct approach to the Big Year challenge A Geo-Big Year Alan M. MacEachren, 2022-11-22 A Geo Big Year Pandemic Retirement is for the Birds This book recounts a year long birding quest across Pennsylvania in 2021 The quest was to see at least 67 bird species in each of the state s 67 counties During the quest year the author now Professor of Geography Emeritus from Penn State University coped with the process of retiring after 42 years in academia and the challenges that the Covid 19 pandemic posed for safe travel The book chronicles the birding experiences and birds seen as well as the travel and retirement challenges The story told chronologically is focused on the search for birds It includes an account of what birds were seen or not seen in specific counties and specific sites within those counties It also recounts the quest itself as it unfolded Written by a Geographer places visited are also highlighted The narrative conveys the adventure of experiencing the mix of both popular and seldom visited places These places were mostly rural and included state and county parks game lands wildlife refuges trails and forests across the state together with less attractive places for humans that still attract birds such as cemeteries retention ponds and county dumps The book includes 471 black and white figures most of which are photo composites of birds seen and or of the places visited In total the 471 figures consist of more than 600 photos of birds plus more than 300 other images that include landscape scenes signage non bird creatures seen maps and graphs The book is intended for a wide audience Aspects of the account should resonate with readers who are or want to be birders are retired or contemplating retirement like to travel particularly on back roads and to natural places that are off the beaten track are academics thinking about work life balance have tried or thought about trying camping after not doing any for a long time have a bucket list to pursue have experienced life changes

Dunlap,2011-12-01 America is a nation of ardent knowledgeable birdwatchers But how did it become so And what role did the field guide play in our passion for spotting watching and describing birds In the Field Among the Feathered tells the history of field guides to birds in America from the Victorian era to the present relating changes in the guides to shifts in science the craft of field identification and new technologies for the mass reproduction of images Drawing on his experience as a passionate birder and on a wealth of archival research Thomas Dunlap shows how the twin pursuits of recreation and conservation have inspired birders and how field guides have served as the preferred method of informal

education about nature for well over a century The book begins with the first generation of late 19th century birdwatchers who built the hobby when opera glasses were often the best available optics and bird identification was sketchy at best As America became increasingly urban birding became more attractive and with Roger Tory Peterson's first field guide in 1934 birding grew in both popularity and accuracy By the 1960s recreational birders were attaining new levels of expertise even as the environmental movement made birding's other pole conservation a matter of human health and planetary survival Dunlap concludes by showing how recreation and conservation have reached a new balance in the last 40 years as scientists have increasingly turned to amateurs whose expertise had been honed by the new guides to gather the data they need to support habitat preservation Putting nature lovers and citizen activists at the heart of his work Thomas Dunlap offers an entertaining history of America's long standing love affair with birds and with the books that have guided and informed their enthusiasm
