Neill, Jayashri Kulkarni, 2011-07-20 Sex matters Are there differences between the sexes when it comes to brain function and the behaviours that result This volume attempts to answer this fundamental question If the answer is yes then this should impact upon our approach to treating mental illness in humans and to modelling it in animals as we look for aetiological and pharmacological solutions Learning Disabilities Bob Gates, Helen Atherton, 2007-01-01 This title is directed primarily towards health care professionals outside of the United States It is the authoritative textbook for students of learning disabilities covering a wide variety of topics It is relevant not only for nursing courses but also for care workers OTs and other professional and non professional carers The new edition has been completely updated and includes the latest evidence for practice There are new chapters which means the book provides comprehensive coverage of learning disabilities throughout a person's life There are also new contributors including people with learning disabilities Each chapter is supported by information on further reading and other resources *The Science of Mental Health: Autism* Steven E. Hyman, 2001 **Autism** Steven E. Hyman, 2013-10-08 First published in 2001 This is Volume 2 in a series on the science of mental health and focuses on Autism It begins with an overview presentation of a case and a recent consensus description of diagnostic instruments for autistic spectrum disorders This is followed by recent epidemiologic data Epidemiology has an enhanced prominence in studies of autism because there is an unresolved controversy about the incidence of new cases of autism In some surveys the incidence of autism appears to be increasing and the controversy is over whether this is a true observation or whether greater diagnostic awareness is leading to the apparent increase This volume attempts to resolve the conflicting data as if autism is indeed on the rise there must be a new significant environmental risk factor which has to be identified with a view to prevention
