## **The Birds Of Nigeria An Annotated Checklist:**

Cuckoos of the World Johannes Erritzøe, Clive F. Mann, Frederik Brammer, Richard A. Fuller, 2012-03-29 This authoritative handbook part of the Helm Identification Guides series looks in detail at the world's cuckoos couas and coucals the family Cuculidae Famed as brood parasites of other birds the cuckoos include a diverse range of species from the roadrunners of North America to the spectacular malkohas of southern Asia This book discusses the biology and identification of these birds on a species by species basis bringing together the very latest research with accurate range maps more than 600 stunning colour photographs that illuminate age and racial plumage differences and 36 superb plates by a team of internationally renowned artists *The Birds of Nigeria* John H. Elgood, J. B. Heigham, 1994 The Birds of Nigeria John H. Elgood, 1982

*The Political Ecology of Oil and Gas Activities in the Nigerian Aquatic Ecosystem* Prince Emeka Ndimele, 2017-11-17 The Political Ecology of Oil and Gas Activities in the Nigerian Aquatic Ecosystem reviews the current status of the ecosystems and economic implications of oil and gas development in Nigeria a key oil producing state The ecological and economic impacts of oil and gas development particularly in developing nations are crucial topics for ecologists natural resource professionals and pollution researchers to understand This book takes an integrative approach to these problems through the lens of one of the key oil producing nations linking natural and human systems through the valuation of ecosystem services Provides background information on Nigerian aquatic environments its local history of oil exploration and a review of the physical chemistry of crude oil Reviews global and national perspectives on the oil and gas industry from a physical ecological to a socio political and economic ecological perspective Demonstrates real life situations of the interactions and impacts of Nigerian petroleum production on the environment and local populations through case studies Parrots Mike Parr, Tony Juniper, 2010-07-30 This is the first book created primarily for the field identification of parrots one of the most familiar and colorful groups of birds From the mighty macaws to the diminutive pygmy parrots the 350 species of parrots include cockatoos parakeets lovebirds and Budgerigars Most are brightly colored or even gaudy but a few are drab and some are nocturnal and flightless Parrots found throughout most of the warmer regions of the world occur in greatest numbers in Australasian and South America This book includes 88 superb color illustrations of every species and most identifiable subspecies of parrot as well as range maps of their locations It offers many firsthand insights into the ecology of each species vocalizations life cycle characteristics and geographical variation It also provides up to date information on the conservation status of those species of parrots that are threatened or endangered Storks, Ibises and Spoonbills of the World James Hancock, James A. Kushlan, M. Philip Kahl, 2010-09-30 Everything you ever wanted to know about storks ibises and spoonbills Some of the world's largest and most spectacular birds are to be found among this group of wading birds Tragically they also include many of the world's most endangered species as changes in land use erode their wetland habitats Some like the White Stork have lived alongside humans for hundreds of years and are well known from numerous studies Others like the

Storm s stork and ibises of West Africa South East Asia and South America live so secluded a life in the remote corners of the globe that they will probably be extinct before even the most basic details of their biology are known In this monograph three authors and two artists have combined their skills to capture what is known of this group of wading birds The text opens with general chapters on taxonomy and feeding breeding and behaviour followed by detailed coverage of each species **Owls of the World** Claus König,Friedhelm Weick,Jan-Hendrik Becking,2009-01-01 Owls are enduringly popular birds but due to their nocturnal habits most species are difficult to see well The plumages of many species are cryptic and difficult to separate by plumage alone This problem is compounded by the different morphs that many adopt This book fully describes every known species and subspecies of owl as well as presenting the latest evidence on owl taxonomy based on DNA work and vocalisations Because voice is vital in owl identification much emphasis is placed on it in the book and sonograms are provided for many species A CD of owl vocalisations will accompany the book Parrots of Africa, Madagascar and the Mascarene Islands Laubscher, Mike Perrin, 2012-12-01 A detailed examination of all aspects of parrots from behavior to their conservation Parrots colour and charisma coupled with the fact that they mimic human speech make them fascinating to many people They are ancient birds with unique bill and foot structures that enable them to forage on fruits in the canopy of forest trees as well as on seeds in grasslands Because they depend on fruits and seeds all year round most species are confined to the tropics or sub tropics where the world s biodiversity is at its greatest There are over three hundred species of parrots of which more than one hundred are recognised as rare endangered vulnerable or threatened with extinction Parrots are largely distributed in tropical areas of developing countries where economies are weak and uncertain and where there is great dependence on the exploitation of natural resources particularly hard wood evergreen forests which are preferred parrot habitats Unfortunately high levels of corruption are common to these regions with much illegal trade in animals and little or no law enforcement Collectors of parrots in the first world pay huge sums for rare parrots However research education and conservation actions are greatly reducing illegal trade in African parrots This book provides complete coverage of all aspects of the biology of extant African Malagasy and Mascarene parrots and reviews our knowledge of extinct and fossil parrots from the region Particular themes include the behavioural and ecological characteristics of parrots their species characteristics and conservation biology Current concepts in avian and conservation biology are also discussed Parrots of Africa Madagascar and the Mascarene Islands is aimed at ornithologists conservation biologists avian ecologists academics bird watchers and parrot fans alike It is well illustrated with high quality original photographs and includes distribution maps figures and tables Wildlife Review ,1985 **The Birds of Africa: Volume IV** ,2020-06-25 This is the fourth volume in the Birds of Africa series covering the rich avifauna of the world s second largest continent Volume IV covers the first 12 families of the passerines Universally recognised as by far the most authoritative work ever published on the subject The Birds of Africa is a superb multi contributor reference work with encyclopaedic species texts stunning

paintings of all species and numerous subspecies hundreds of informative line drawings detailed range maps and extensive bibliographies Each volume contains an Introduction that brings the reader up to date with the latest developments in African ornithology including the evolution and biogeography of African birds Diagnoses of the families and genera often with superspecies maps are followed by the comprehensive species accounts themselves These include descriptions of range and status field characters voice general habits food and breeding habits Full bibliographies acoustic references and indexes complete this scholarly work of reference This fourth volume in the series deals comprehensively with broadbills pittas larks swallows and martins wagtails pipits and longclaws cuckoo shrikes bulbuls waxwings dippers wrens accentors and chats The editors and artists have worked closely with other authors all acknowledged experts in their field to produce a superb reference in which comprehensive texts on every species are complemented by accurate and detailed paintings and drawings of the birds themselves

***Shrikes and Bush-shrikes*** Tony Harris, 2010-06-30 Covering the identification biology and relationships of all true shrikes bush shrikes helmet shrikes wood shrikes shrike flycatchers philentomas batises and wattle eyes this book offers information on 114 species in 21 genera within the families Laniidae and Malaconotidae For each genus acoustic and visual signals are summarized and used to map similarities The detailed species account for the bulk of the book providing knowledge on field identification plumage descriptions geographical variation moult distribution movements general and foraging behaviour food sounds and breeding behaviour

***Rails*** Barry Taylor, 2010-08-30 This is a guide to rails a relatively homogeneous family of birds spread throughout the world Barry Taylor and Ber van Perlo have described and illustrated 145 species of rails including two that are newly described and also ten that are recently extinct and two that are almost certainly extinct The book based on up to date references and on new observations is the first to give comprehensive information on field identification including voice covering all species and races for which details are known It is also the first to provide descriptions of the immature and juvenile plumages of many species The authors provide a detailed summary of current knowledge of all aspects of rail biology and their often complex behaviour social structure and family life They explain how such apparently poorly flying birds can undertake intercontinental migrations and are such widespread and successful colonists of remote oceanic islands They also discuss the remarkable ease and speed with which species on such islands have evolved into flightless forms in the absence of predators a fact that has led to the rapid extinction of numerous island taxa following the arrival of man Rail habitats are fast disappearing say the authors and many rails become endangered before enough is known about them to plan effective conservation measures The book provides information on distribution status habitat requirements and current threats and it gives conservation priorities for threatened species

***Pigeons and Doves*** David Gibbs, 2010-06-30 This volume is dedicated to the field identification of pigeons and doves and it incorporates much recent information on the family Pigeons and doves are a large family of birds occurring throughout the world Many species are specialist frugivores while others feed on seeds Most are arboreal and the tropical

species in particular are often brightly coloured The family includes gregarious migratory species as well as shy ground dwelling forms such as the exotic crowned pigeons of New Guinea **Robins and Chats** Peter Clement, 2016-01-28 This authoritative handbook part of the Helm Identification Guides series looks in detail at the world's 170 species of robins and chats This large family of small passerines was formerly considered to be part of the thrush family Turdidae but is now usually treated as a separate family Muscicapidae together with the Old World flycatchers The vast majority of species are Eurasian or African with only a handful of species straying into the New World or Australasia The Australian Robins although superficially similar have long been regarded as a separate family Robins and chats are a diverse family comprising both highly colourful and visible species such as the robin chats of Africa as well as some of the most skulking and elusive birds such as the shortwings of Asia Many chats such as the well known Nightingale are renowned songsters and a good number are highly sought after by world listers for their extreme rarity or simply because they are hard to see This book discusses the identification and habits of these birds on a species by species basis bringing together the very latest research with accurate range maps more than 600 stunning colour photographs that illustrate age and racial plumage differences and 64 superb colour plates by the internationally renowned artist Chris Rose This authoritative and sumptuous book will be an essential purchase for all chat enthusiasts and will become the standard reference on the subject for many years to come

**Sunbirds** Clive F. Mann, Robert A. Cheke, 2010-07-30 Sunbirds is the first book since the 19th Century to cover in detail all the world's sunbirds and spiderhunters the Nectarinidae It also includes the allied families of flowerpeckers and sugarbirds a total of 176 species is described and illustrated The book has been designed to help readers identify all of these species and also their various subspecies the most distinctive of which are illustrated as well as described Each species account provides a distribution map a summary of identification criteria and a description of how the species differs from similar ones The calls and songs habitat geographical distribution status movements food including a list of known food plants habits and breeding biology are also described Finally a full description of the species and salient features of each subspecies is given together with measurements and references Sunbirds not only aids identification it provides a wealth of information on the ecology and behaviour of these birds The authors have carried out extensive fieldwork in Asia and Africa They have also studied skins nests and eggs held by museums analysed tape recordings and critically reviewed the vast amount of material contained in books and scientific journals The superb plates would not have been possible without the exhaustive study of specimens which together with the use of photographs of living birds has resulted in the artist Richard Allen capturing the essence of the birds their jizz and accurately portraying the beautiful bright often iridescent plumages of these spectacular families **The Cuckoos** Robert B. Payne, 2005-07-14 The cuckoos are the most variable birds in social behavior and parental care a few cuckoos are among the most social of all birds and rear their young in a common nest most cuckoos are caring parents that rear their own young with some females laying a few eggs in the nests of others while many

cuckoo species are brood parasites who leave their eggs in the nests of other birds to rear with their young maturing to kill their foster nestmates In *The Cuckoos* Robert B Payne presents a new evolutionary history of the family based on molecular genetics and uses the family tree to explore the origins and diversity of their behaviour He traces details of the cuckoos biology to their original sources includes descriptions of previously unpublished field observations and reveals new comparisons of songs showing previously overlooked cuckoo species Lavishly illustrated with specially commissioned colour plates and numerous maps halftones and line drawings *The Cuckoos* provides the most comprehensive and up to date account of this family yet available

**Sunbirds of the World** Robert A. Cheke, Clive F. Mann, 2025-06-12 This is a gorgeous book about some of the world's most gorgeous birds JARED DIAMOND Sunbirds are among the most striking of all bird groups their dazzling iridescent plumage and long curved bills are conspicuous when the birds visit garden flowers on sunny days to feed on nectar Some species especially the females are duller in appearance and harder to spot feeding mostly on insects high up in forest canopies Spiderhunters as their name suggests feed extensively on spiders while sunbirds other close relatives the flowerpeckers are especially partial to mistletoe berries This book is the last word on sunbird identification ecology and behaviour Now in its second edition it has been fully revised and updated to reflect the many developments that have occurred in sunbird taxonomy as well as the new research that has been published on their biology It covers all 218 currently recognised species providing details of key identification features voice habitat distribution conservation status movements food and behaviour New colour art by award winning artist Richard Allen has been added and hundreds of high quality colour photographs beautifully capture every species Maps accurately depict geographical distributions of each taxon to subspecies level This beautiful book is the definitive reference to the sunbirds flowerpeckers spiderhunters and sugarbirds of the world and is essential reading for researchers birders and conservationists alike
