

EASTERN REGION

An illustration of a bird, possibly a flycatcher, with a purple head and back and a reddish-orange breast, perched on a thin, leafless branch. The background shows a larger tree trunk on the left and a dense canopy of green leaves above. The title text is overlaid on the right side of the illustration.

discussions of breeding biology and the latest taxonomic revisions Introductory chapters provide overviews of Turkey's major biomes and the history of ornithology in the country and a discussion of future research objectives The book also contains stunning colour photography by a number of leading Turkish ornithologists Indispensable for anyone interested in the Turkish avifauna The Birds of Turkey will remain the standard work on this key ornithological region for many years to come

Seven Names for the Bellbird Mark Bonta, 2003-06-17 Offering intimate and unforgettable descriptions of the birds and people that inhabit Honduran landscapes *Seven Names for the Bellbird* showcases the deep rooted local traditions of bird appreciation and holds them up as a model for sound management of the environment Through his appreciative recounting of local lore author Mark Bonta makes the interaction between culture and avifauna in Latin America a key to better understanding the practice of biodiversity protection He makes a significant contribution to the scarce anthropological and geographical literature on human environment relationships in Central America and also provides wonderful stories of native birds and their human observers After a decade in the field in Honduras Mark Bonta came to realize that contrary to outsiders' general beliefs the society he observed was predisposed to like birds to observe birds to weave them into folklore and to protect them on private property Bonta argues that if North Americans and Europeans paid real attention to local knowledge and practice instead of condemning them out of hand and imposing new beliefs and techniques they would learn that rural cultures offer alternative ways of accommodating habitats and wildlife Bonta uses the concept of conservation geography the study of human beings and their landscapes with natural resource conservation in the forefront to advance his argument He describes many cases where local individuals and their traditional knowledge of birds contribute to a de facto variety of bird conservation that precedes or parallels official bird protection efforts This book is not offered as proof that all birds have happy futures in the Neotropics Bonta recognizes the ravages of both human pressures and natural disasters on the birds and forests But he shows that in many instances birds are safe and even thrive in the presence of local people who celebrate them just as often as they persecute them

Birding at Point Pelee Henrietta O'Neill, 2006-10-03 A birder's history of one of Canada's most famous birding spots *Birding at Point Pelee* traces Point Pelee's story from the 1870s to the national park's establishment in 1918 to present day when as many as 50 000 birders visit the park in May during spring migration The book portrays the backdrop against which the park was evolving the scientific discoveries and changes in ornithological methods through the decades early specimen collecting bird banding the development of binoculars and telescopes the growth of nature photography the shift from birding as science to birding as hobby as well as philosophical shifts and debates about amateur versus professional credentials and the balance to strike between conservation and recreation Thoroughly researched and lively the story takes readers from the earliest days when the birders were few but fervent to today's international tourism phenomenon
