the final preparations for his daughter's birthday party. Finding out that she is pregnant by someone he does not approve of, he tries to persuade her to end the pregnancy. His private doctor and oldest friend is standing by to perform the procedure. Among the other guests is the tycoon's ambitious biographer. The story intersperses the riveting events that unfold during the day of the party with the tycoon's rise to wealth and fame from childhood in Asia Minor to old age via Buenos Aires, New York, London, and Paris, and the attempts of his young biographer to bring his subject's true personality to light. *The Birthday Party* is at once fascinating, revealing, and hilarious, a gripping novel that comments upon the art of biography and the invention of a human life. *The Birthday Party Book* Jeremy Sage, Kathryn Watterson, 1987. Gives advice about all the major decisions that

parents have to make when planning a birthday party. *The Consciousness' Drive* Charles Cole, 2018-09-18. What is the uniquely human factor in finding and using information to produce new knowledge? Is there an underlying aspect of our thinking that cannot be imitated by the AI-equipped machines that will increasingly dominate our lives? This book answers these questions and tells us about our consciousness, its drive or intention in seeking information in the world around us, and how we are able to construct new knowledge from this information. The book is divided into three parts, each with an introduction and a conclusion that relate the theories and models presented to the real-world experience of someone using a search engine. First, Part I defines the exceptionality of human consciousness and its need for new information and how uniquely among all other species we frame our interactions with the world. Part II then investigates the problem of finding our real information need during information searches and how our exceptional ability to frame our interactions with the world blocks us from finding the information we really need. Lastly, Part III details the solution to this framing problem and its operational implications for search engine design for everyone whose objective is the production of new knowledge. In this book, Charles Cole deliberately writes in a conversational style for a broader readership, keeping references to research material to the bare minimum. Replicating the structure of a detective novel, he builds his arguments towards a climax at the end of the book. For our video game video on demand, times he has visualized the ideas that form the book's thesis in over 90 original diagrams. And above all, he establishes a link between information need and knowledge production in evolutionary psychology and thus bases his arguments in our origins as a species: how we humans naturally think and how we naturally search for new information because our consciousness drives us to need it. **Children's Knights of the Round Table**
