The Bottoms Up Of International Development:

The Bottoms Up of International Development Richard A. Meganck, Richard E. Saunier, 2003-02-01 **Planning from the Bottom Up** Anirban Pal, 2008 Highlights the gap between the official rhetoric and the political reality of democratic decentralisation and bottom up planning using an in depth study of the metropolitan planning process in Kolkata India This book focuses on the dynamic interactions between planners and the operation of the political process that shapes this reality **From the Bottom Up** Bernard Tenenbaum, Chris Greacen, Tilak Siyambalapitiya, James Knuckles, 2014-01-23 This report describes the four basic types of on and off grid small power producers emerging in Africa and highlights the regulatory and policy questions that must be answered by electricity regulators rural energy agencies and ministries to promote commercially sustainable investments by private operators and community organizations **Governance from the Bottom Up** Charles F. Bingman, 2016-10-28 Perhaps the most difficult thing that human beings are called upon collectively to do is to run a government Why do so many fail There are 196 countries in the world about 150 of them significant At least 105 of them briefly summarized here are in deep trouble Deep trouble is defined by wars insurrections active internal conflict serious maldistribution of wealth deep and widespread poverty rampant corruption serious lack of social services and public infrastructure and an excess of plain old bumbling government incompetence created and exacerbated by the governments themselves out of greed viciousness and an insatiable lust for power This is the tragic record of government from the top down It is therefore vital to strengthen the bottom up elements of national activity and at the same time people must try to point these stronger elements toward resistance to top down authority The new and growing hope is that decent people and organizations all over the world will increasingly rise up in their own defense and bring a new level of moderation and spirit of aid and service from the bottom up to these failing states that are their homes Globalization from the Bottom Up A. Coskun Samli, 2008-12-05 The net profit of Exxon for the year 2005 was reported to be almost 8 billion which reflected about 40 percent growth in its profit picture within a year As profit pictures of fuel arms medical services and financial services industries among others reach unbelievable levels by definition most consumers get poorer because they have less money left for other essentials for their lives such as food education medical needs and housing Adding insult to injury of the 100 largest budgets in the world 52 belong to private corporations Needless to say such accumulation of economic power and such mind boggling profit pictures do not encourage any movement on the part of these powerhouse companies to reach out and do something about the troubled world within which they have amassed such economic and indeed directly political power This is a questionable view of the world I have to get more power before others do it and I get it at the expense of others This is what this author coins the GREED FACTOR As has been said power corrupts and absolute power corrupts absolutely The greed factor unfortunately is at the threshold of solute power that corrupts absolutely Unchecked and unguided continuity of this orientation is bound to bring disaster to this very fragile planet called the earth We must establish a point of view that if

the world we live in does better there will be more for everyone In other words everyone will be better off economically

Bottom-Up Politics D. Kostovicova, M. Glasius, 2011-12-08 Adopting a people centred perspective to globalization the authors explore complex counterintuitive and even unintended forms and consequences of bottom up politics going beyond simplistic understandings of ordinary people as either victims or beneficiaries of globalization

Innovations in 'Sport for Development and Peace' Research Megan Chawansky, Lyndsay Hayhurst, Mary G. McDonald, Cathy van Ingen, 2020-06-04 Transnational organizations and practitioners who use sport for international development often position sport as a unique option for tackling development challenges While sport can be a tool for social change the authors in this collection bring a critical eye to this assumption and offer new perspectives on the use of sport for development and peace SDP in local and global contexts The book seeks to generate new dialogues and explore linkages for development and SDP researchers through considerations of sport's potential to challenge and or perpetuate key global issues and problems These analyses consider the SDP work done on the ground and interrogate the historical social and political circumstances of these practices The authors explore how best to examine theorize critique and potentially improve local SDP initiatives This book will be of great interest to students and researchers of both Development Studies and Sport It was originally published as a special issue of the online journal Third World Thematics

Alternative and bottom-up peace indicators Roger Mac Ginty, 2016-04-14 There is widespread dissatisfaction with the current suite of evaluation and monitoring tools available to peacebuilders and those responding to conflict Yet despite this dissatisfaction there are few concrete moves to investigate alternative methods of gauging the success or failure of peace initiatives This volume explores alternative methods of assessing peace These methods tend to be bottom up and people centric and are interested in many aspects of conflict societies that orthodox top down indicators often miss The methods explored in this work chime with the contemporary interest in critical approaches to

peace and conflict studies and approaches that are interested in local perspectives The volume also connects with a growing interest in civic epistemology or the co production of data whereby research subjects participate in the research and have a chance of understanding the relevance of research All of the contributors to the volume have significant field experience in conflict affected areas and their work is informed by an engagement with the everyday challenges and opportunities facing people in war zones This book was published as a special issue of the Journal of Intervention and Statebuilding Oil and Gas in the Disputed Kurdish Territories Rex J. Zedalis, 2012 Much of Iraq's considerable oil and gas reserves are thought to lie in the areas of northern Iraq claimed by the Kurds Some of this area is under the control of Kurdish Regional Government KRG but much of the oil and gas is in disputed territories The question of authority over these oil and gas reserves is important not only to the international energy companies with negotiated agreements with the KRG for the exploitation of these resources but also because the issue is a major factor in the relations between the central government in Baghdad and the KRG regional authorities undermining the prospect for a unified Iraq This book examines the historical and contextual background to the oil and gas in the Kurdish territories placing particular emphasis on the reserves situated in the provinces disputed with the central government The book examines the legal basis of the current dispute looking at the relevant legislation including the Iraqi federal constitution the KRG's own constitution and extant contracts with international oil companies It also considers the developing international law on traditional peoples and their claims to natural resources The book connects the legal questions which form the basis of this dispute and considers the larger issues of access to natural resources as well as the place of regional minorities in federal systems The book offers a critical assessment of the existing law as well as current efforts to address the Kurdish oil and gas controversy especially from the perspective of federal systems Provided by publisher *Building Bottom-up Health and Disaster Risk Reduction Programmes* Emily Ying Yang Chan, 2018 Introductory to intermediate level textbook and reference book for healthcare professionals fieldworkers volunteers and students who are interested in promoting health and emergency and disaster risk reduction in Asia

Global Learning and International Development in the Age of Neoliberalism Stephen McCloskey, 2021-10-13 This book argues that the international development sector is in crisis which can be mostly sourced to its side stepping the dominant development question of our age the neoliberal growth paradigm It argues that this crisis can be addressed at least in part by the sector's re engagement with the radical development education process that it helped to foster and sustain for over two decades The recent safeguarding scandal is symptomatic of a sector that is becoming overly hierarchical brand conscious and disconnected from its base This book argues that many of the problems the sector is facing can be sourced to its failings in grappling with the question of neoliberalism and formulating a coherent critique of how market orthodoxy has accelerated poverty in the global North and South This book recommends re embracing the radical origins of global learning situated in the participative methodology and praxis reflection and action of Paulo Freire both as internal capacity building and external public engagement The book proposes a new development paradigm focusing on bottomup participative approaches to policy making based on the needs of those NGOs claim to represent the poor marginalised and voiceless rather than constantly following the agenda of donors and governments The recommendations made by this book will serve as an important resource for researchers and students of international development and global learning as well as to NGOs civil society activists and education practitioners looking for solutions to the problems within the sector

Empowerment Through Agency Enhancement Mine Sato, Nobuo Sayanagi, Toru Yanagihara, 2022-05-04 This book focuses on the understanding of factors and mechanisms involved in the

development of agency mainly in three related contexts participatory development extension work and service transactions The research has its starting point in the recognition of the critical role played by agency commonly understood as want will for and practice of self determination and self management on the part of intended beneficiaries of services and projects for effective implementation and sustainability It is designed to address this subject matter with its principal focus on inner capacities and orientations of human beings posing questions as to how such capacities and orientations could be enhanced and activated in practice by external actors in the field of public policies for socioeconomic and international development The project is organized transcending traditional disciplinary boundaries combining anthropological psychological and economic approaches and perspectives

The Project in International Development Caitlin Scott,2023-06-26 The project has become fundamental to international development and humanitarian practice playing a key role in defining objectives funding streams and ultimately determining what success looks like This book provides a much needed overview of the project in international development practice guiding the reader through the latest theoretical debates and exploring the core tools and stages of planning and design The book starts with an overview of the role of the project through development history before taking the reader through the stages of a standard project management cycle Each chapter introduces the stage the most common tools used to support that phase of planning and the critical debates that exist around it with examples to illustrate discussions from around the world and a range of development fields The book explores the challenges to working effectively in contemporary aid contexts including the role of politics and the pressures wrought by the demands to demonstrate quantified results Throughout the book argues for the need to see the project as a form of governmentality that arranges resources and people in time and space and that extends neoliberal forms of managerial control in the sector Ending with suggestions for innovation this book is perfect for anyone looking for an accessible and engaging guide to the international development project whether student researcher or practitioner
