Smell The Secret Seducer:

Smell P. A. Vroon, Anton van Amerongen, Hans de Vries, 1997 Explores how some cultures value the sense of smell while others see it as evidence of decadence or barbarism and others try to cleanse the air of any pungent smells at all *The Smell of Slavery* Andrew Kettler, 2020-05-28 In the Atlantic World different groups were aromatically classified in opposition to other ethnic gendered and class assemblies due to an economic necessity that needed certain bodies to be defined as excremental which culminated in the creation of a progressive tautology that linked Africa and waste through a conceptual hendiadys born of capitalist licentiousness The African subject was defined as a scented object appropriated as filthy to create levels of ownership through discourse that marked African peoples as unable to access spaces of Western modernity Embodied cultural knowledge was potent enough to alter the biological function of the five senses to create a European olfactory consciousness made to sense the African other as foul Fascinating informative and deeply researched *The Smell of Slavery* exposes that concerns with pungency within the Western self were emitted outward upon the freshly dug outhouse of the mass slave grave called the Atlantic World **Revelations in Air** Jude Stewart, 2021-10-26 An extraordinary strange and startlingly beautiful exploration of smell the least understood of our five senses The nose on your face is the Buckingham Palace Guard of your body the maitre d of all taste as well as the seducer of your imagination and memory and Jude Stewart has charmed them all into a wicked poetic and illuminating tour of their mysterious domains Jack Hitt author of *Bunch of Amateurs* Overlapping with taste yet larger in scope smell is the sense that comes closest to pure perception Smell can collapse space and time unlocking memories and transporting us to worlds both new and familiar Yet as clearly as each of us can recognize different smells the bright tang of citrus freshly sharpened pencils parched earth after rain few of us understand how and why we smell In *Revelations in Air* Jude Stewart takes us on a fascinating journey into the weird and wonderful world of smell Beginning with lessons on the incredible biology and history of how our noses work Stewart teaches us how to use our noses like experts Once we re properly equipped and ready to sniff Stewart explores a range of smells from lavender cut grass and hot chocolate to cannabis and old books using smell as a lens into art history science and more With an engaging colorful design and exercises for readers to refine their own skills *Revelations in Air* goes beyond science or history or chemistry it s a doorway into the surprising pleasurable and unfamiliar landscape of smell *Smelling and Tasting* Alvin Silverstein, Virginia B. Silverstein, Laura Silverstein Nunn, 2002-01-01 Describes the function of smells and tastes how the brain translates and processes these messages and the research in these areas **The Art of City Making** Charles Landry, 2012-05-16 City making is an art not a formula The skills required to re enchant the city are far wider than the conventional ones like architecture engineering and land use planning There is no simplistic ten point plan but strong principles can help send good city making on its way The vision for 21st century cities must be to be the most imaginative cities for the world rather than in the world This one change of word from in to for gives city making an ethical foundation

and value base It helps cities become places of solidarity where the relations between the individual the group outsiders to the city and the planet are in better alignment Following the widespread success of *The Creative City* this new book aided by international case studies explains how to reassess urban potential so that cities can strengthen their identity and adapt to the changing global terms of trade and mass migration It explores the deeper fault lines paradoxes and strategic dilemmas that make creating the good city so difficult

The Transmission of Affect Teresa Brennan,2014-02-15 The idea that one can soak up someone else's depression or anxiety or sense the tension in a room is familiar Indeed phrases that capture this notion abound in the popular vernacular negative energy dumping you could cut the tension with a knife *The Transmission of Affect* deals with the belief that the emotions and energies of one person or group can be absorbed by or can enter directly into another The ability to borrow or share states of mind once historically and culturally assumed is now pathologized as Teresa Brennan shows in relation to affective transfer in psychiatric clinics and the prevalence of psychogenic illness in contemporary life To neglect the mechanism by which affect is transmitted the author claims has serious consequences for science and medical research Brennan's theory of affect is based on constant communication between individuals and their physical and social environments Her important book details the relationships among affect energy and new maladies of the soul including attention deficit disorder chronic fatigue syndrome codependency and fibromyalgia

Encyclopedic Dictionary of Semiotics, Media, and Communication Marcel Danesi,2000-08-01 Semiotics Media Studies and Communication Studies are three closely interlinked fields Briefly stated Semiotics the science of signs looks at how humans search for and construct meaning Communication Studies is concerned with how meaning is conveyed and Media Studies considers the ways in which messages are transmitted and received This dictionary is designed to help students and general readers unlock the significance of the terminology and jargon commonly used in these fields Being interdisciplinary in nature Semiotics Media and Communication Studies are cluttered with notions derived from other disciplines Hence this dictionary also encompasses basic concepts from the fields of anthropology archaeology psychology psychoanalysis linguistics philosophy artificial intelligence computer science and biology Collected here are the terms concepts personages schools of thought and historical movements that appear frequently in the relevant literature The basis of each entry is a simple definition which often includes the term's origin Illustrations are provided where necessary along with historical sketches of movements or schools of thought The commentary on personages consists of brief statements about their contribution and relevance Thus the dictionary not only defines what a term means but often goes into its history applications and broad implications Terms

are cross referenced and their etymology is given where possible This is a compact practical research manual that will relieve much tension for students in semiotics and related fields Because of its interdisciplinary approach it will also provide a range of scholars with a handy reference to disciplines distinct from but related to their own **FBI Law Enforcement Bulletin**, 1999 **Who Cut the Cheese?** Jim Dawson, 2011-01-26 We've told you HOW TO SHIT IN THE WOODS We've taken you UP SHIT CREEK Now we dare to ask the eternal question WHO CUT THE CHEESE Which is to say what exactly is a fart Why do we do it Why do we hide it when we do it And why do we find farts so darn funny A cut above anything else on the subject this book really lets go and tells all getting to the bottom of these mysteries Author Jim sniffs out a load of historical and scientific fart tales then offers the kind of fun facts you'll be dying to let slip at social occasions in chapters like Fart Facts That Aren't Just Hot Air Gone with the Wind on famous movie farts and Le Petomane the Art of the Fart on the most famous windbag in history From fact to fiction to frivolous flatulence this book is unquestionably a ripping good read
