The Big Brothers The Story Of The B 29s:

The B-29 Superfortress Chronology, 1934-1960 Robert A. Mann, 2009-09-12 The Boeing B 29 Superfortress lived an operational life of only 26 years but what a life it was The introduction to this book provides basic information on the physical plane dimensions specs leading particulars and operational usages Then an exhaustive day by day chronology of the B 29 is presented from the earliest designs in 1934 through thousands of missions and aircraft events in World War II and Korea to the 1960 retirement of the last operational B 29 The book also includes an extensive glossary and three appendices which provide a discussion of the general anatomy of a mission a sample of operational voice or radio codes used in 1945 and a guide to very unofficial aircraft names *The Big Brothers, the Story of the B-29s* William Boyd Sinclair, 1972 In May 1944 Gen Joseph W Stilwell Commander CBI Theatre initiated an aerial operation that proved to be the decisive factor in Japan s ultimate surrender The Big Brothers set records for long distance missions for bombings and high and low levels for incendiary attacks on Tokyo and other Japanese cities and for an aerial mining operation that crippled Japan s life line to supplies Then this same Superfortress delivered the atomic bomb to Hiroshima and Nagasaki **The Silverplate Bombers** Richard H. Campbell, 2012-03-15 This book documents the development and delivery of the Silverplate B 29 bomber the remarkable airplane with capabilities that surpassed those of known enemy fighters of the time and was employed to release the first atomic bomb on Hiroshima in 1945 The basic history from conception to successful development is set forth in the early chapters which discuss the then secret work of the 509th Composite Group Subsequent chapters discuss the Los Alamos test program Silverplate B 29 combat operations the Air Force bases from which the aircraft operated accidents associated with operations and details of the atomic bombs carried Concluding chapters give special attention to the members of the 509th who were responsible for dropping the bombs and whose efforts brought an end to World War II provided the backbone of America s nuclear deterrent force in the years after the war and opened the Atomic Age

United States Air Force and Its Antecedents James T. Controvich, Martin Gordon, 2004-06-24 This bibliography lists published and printed unit histories for the United States Air Force and Its Antecedents including Air Divisions Wings Groups Squadrons Aviation Engineers and the Women s Army Corps *Boeing B-29 Superfortress* William Wolf, 2005 Although many books have been published about the B 29 none has been an in depth look with most being either superficial pictorials or focusing on the bombing campaigns particularly the incendiary attacks and atomic bombings This book using rare previously unexplored sources intends to provide the definitive look at the bomber and crew detailing every facet for the air enthusiast historian and modeler The author was granted rare access to the Pima Air Space Museum s restored B 29 Sentimental Journey for inspection and photography resulting in the most extensive photographic documentation of the B 29 ever published The Pima Museum s archives filled with B 29 technical and crew manuals also gave the author extensive information that had not been previously published These sources the author s extensive personal library and microfilm

resources enabled the author to produce this comprehensive look at the bomber and its crew in the context of the bomber's development and operational use. It is truly monumental in scope both in words and photos. **The War in the Pacific**

Duane Ryan, US Army Military History Institute, 1978 **Special Bibliographic Series** US Army Military History Research Collection, 1977 [An Aerospace Bibliography](#), 1978 **The Age of Airpower** Martin Van Creveld, 2011-04-12 Airpower more than any other factor has shaped war in the twentieth century. In this fascinating narrative history, Martin van Creveld vividly portrays the rise of the plane as a tool of war and the evolution of both technology and strategy. He documents seminal battles and turning points and relates stories of individual daring and collective mastery of the skies. However, the end of airpower's glorious age is drawing near. The conventional wisdom to the contrary, modern precision-guided munitions have not made fighter bombers more effective against many kinds of targets than their predecessors. In World War II, U.S. ground troops calling for air support in Iraq in 2003 did not receive it any faster than Allied forces did in France in 1944. And from its origins, airpower has never been very effective against terrorists, guerrillas, and insurgents. As the warfare waged by these kinds of people grows in importance and as ballistic missiles, satellites, cruise missiles, and drones increasingly take the place of quarter-billion-dollar manned combat aircraft and their multi-million-dollar pilots, airpower is losing utility almost day by day. **The War Against Japan, 1941-1945** John J. Sbrega, 2015-06-12 With over 5,200 entries, this volume remains one of the most extensive annotated bibliographies on the U.S.'s fight against Japan in the Second World War. Including books, articles, and declassified documents up to the end of 1987, the book is organized into six categories. Part 1 presents reference works including encyclopedias, pictorial accounts, military histories, East Asian histories, historiographies. Part 2 covers diplomatic, political aspects of the war against Japan. Part 3 contains sources on the economic and legal aspects of the war against Japan. Part 4 presents sources on the military aspects of the war embracing land, air, and sea forces. Religious aspects of the war are covered in Part 5, and Part 6 deals with the social and cultural aspects, including substantial sections on the treatment of Japanese minorities in the USA, Hawaii, Canada, and Peru. [Cultures of War: Pearl Harbor / Hiroshima / 9-11 / Iraq](#) John W. Dower, 2010-09-17 Finalist for the 2010 National Book Award in Nonfiction. The Pulitzer Prize-winning historian returns with a groundbreaking comparative study of the dynamics and pathologies of war in modern times. Over recent decades, John W. Dower, one of America's preeminent historians, has addressed the roots and consequences of war from multiple perspectives. In *War Without Mercy* (1986), winner of the National Book Critics Circle Award, he described and analyzed the brutality that attended World War II in the Pacific as seen from both the Japanese and the American sides. In *Embracing Defeat* (1999), winner of numerous honors including the Pulitzer Prize and the National Book Award, he dealt with Japan's struggle to start over in a shattered land in the immediate aftermath of the Pacific War when the defeated country was occupied by the U.S.-led Allied powers. Turning to an even larger canvas, Dower now examines the cultures of war revealed by four powerful events: Pearl Harbor, Hiroshima, 9/11, and the invasion of Iraq in the name of a war on terror. The list

of issues examined and themes explored is wide ranging failures of intelligence and imagination wars of choice and strategic imbecilities faith based secular thinking as well as more overtly holy wars the targeting of noncombatants and the almost irresistible logic and allure of mass destruction Dower s new work also sets the U S occupations of Japan and Iraq side by side in strikingly original ways One of the most important books of this decade Cultures of War offers comparative insights into individual and institutional behavior and pathologies that transcend cultures in the more traditional sense and that ultimately go beyond war making alone *Air University Library Index to Military Periodicals* ,1971 *Special Bibliography* ,1978 *Library of Congress Catalogs* Library of Congress,1976 **The Heroes We Needed** Trevor B McIntyre,2024-10-31 McIntyre recounts the stories of many airmen who did not return which are undeniably touching as are the photographs he includes Because of their size the B 29s were able to drop the atomic bombs that ended the war But it is the human stories that resonate the most A heartfelt account of the men who flew the combat airplane known as the Superfortress Kirkus Reviews During World War II there were many ways that a B 29er could be killed a ruthless enemy an unforgiving ocean that stretched for thousands of miles or the faulty engines of their own airplanes But they all volunteered for it and they continued flying and dying until they brought the war to an early end and saved hundreds of thousands of American lives They were The Heroes We Needed In this riveting saga of sacrifice and salvation Trevor McIntyre brings to life the courageous American airmen who brought the Japanese Empire to its knees and ended World War II with the greatest bombers the world had ever seen the Boeing B 29 Superfortress and his fight 70 years later to save their stories from being forgotten *The Navigator* ,1961 *Appleton's Popular Science Monthly* ,1948 **Library of Congress Catalog** Library of Congress,1970 *This Day in American History*, 4th ed. Ernie Gross,Roland H. Worth, Jr.,2018-01-16 This up to date fourth edition of the most important and interesting data on a day by day basis throughout American history includes more than 1 400 new entries with information on a wide variety of subjects both the important matters Supreme Court decisions war events scientific breakthroughs etc and the lesser known but thought provoking incidents and phenomena societal changes unexpected events that add richness and depth to American history *Air Force and Space Digest* ,1945
