The Big Cats Guy Coheleach, Nancy A. Neff, 1982-01-01 The Fauna of Sri Lanka Channa N. B. Bambaradeniya, 2006

Cheetahs of the Serengeti Plains Timothy M. Caro, 1994-08-15 Cheetahs of the Serengeti Plains is the most comprehensive account of carnivore social behavior to date Synthesizing more than a decade of research in the wild this book offers a detailed account of the behavior and ecology of cheetahs Compared with other large cats and other mammals cheetahs have an unusual breeding system whereas lions live in prides and tigers are solitary some cheetahs live in groups while others live by themselves Tim Caro explores group and solitary living among cheetahs and discovers that the causes of social behavior vary dramatically even within a single species Why do cheetah cubs stay with their mother for a full year after weaning Why do adolescents remain in groups Why do adult males live in permanent associations with each other Why do adult females live alone Through observations on the costs and benefits of group living Caro offers new insight into the complex behavior of this extraordinary species For example contrary to common belief about cooperative hunting in large carnivores he shows that neither adolescents nor adult males benefit from hunting in groups With many surprising findings and through comparisons with other cat species Caro enriches our understanding of the evolution of social behavior and offers new perspectives on conservation efforts to save this charismatic and endangered carnivore Murlo and the Etruscans Richard Daniel De Puma, Jocelyn Penny Small, 1994 Murlo and the Etruscans explores this and other mysteries in a collection of twenty essays by leading specialists of Etruscan and classical art all of whom have been associated with the Murlo site Numerous photographs and drawings accompany the essays The first eleven chapters survey specific groups of Etruscan objects and challenge the view of Etruscan art as provincial or derivative Interpretations of the magnificent series of decorated terra cotta frieze plaques and other architectural elements contribute to an understanding of Murlo and related Etruscan centers Plaques depicting a lively Etruscan banquet offer a way to detect differences between Etruscan and ancient Greek society The remaining nine chapters treat various aspects of Etruscan art often moving beyond ancient Murlo both geographically and temporally They examine funerary symbolism sculpted amber and amber trade contacts along the ancient Adriatic Coast depictions of domesticated cats votive terra cottas of human anatomical parts and how they help in understanding Etruscan medicine and the adaptation of Greek style myth and iconography in Etruscan art These essays will have a broad impact on the study of the ancient Mediterranean They will certainly be required reading not only for Etruscologists but for anyone with an interest in the world of classical antiquity The range of subjects moving in wide arcs around the archaeological site at Murlo brings the site into focus in a way that a series of standard archaeological site reports could not Kenneth Hamma J Paul Getty Museum There is a fine and commendable interweaving and intertwining of thoughts and scholarly research throughout Murlo and the Etruscans It will be a useful reference source for the art of Etruscan coroplast wherein lies the forte of the Etruscan sculptor Mario A Del Chiaro University of California *Big Cats*

Douglas Richardson, 1992 Describes the physical characteristics habits and natural environment of various species of big cats lions tigers leopards jaguars cheetahs pumas snow leopards and clouded leopards *Wild Cats of the World* Mel Sunquist, Fiona Sunquist, 2017-05-15 Did you know that European royalty once used cheetahs to hunt deer or that caracals can capture birds by leaping six and a half feet straight up into the air from a standing start Have you ever wondered whether domestic cats really do land on their feet when they fall or how Canada lynx can stalk their prey in the winter without falling through the deep snow Wild Cats of the World is a treasure trove of answers to questions like these and many others for anyone who is interested in learning more about the world's felids including the ones with whom we share our homes Mel and Fiona Sunquist have spent more than a decade gathering information about cats from every available source many of them quite difficult to find including scientific papers descriptions of hunts archeological findings observations by naturalists and travelers reports from government agencies and newsletters from a wide variety of organizations Weaving information from these sources together with their own experiences observing wild cats around the world the Sunquists have created the most comprehensive reference on felids available Each of their accounts of the 36 species of cat contains a description of the cat including human interactions with it as well as detailed data on its distribution ecology and behavior status in the wild and efforts to conserve it Numerous photographs including more than 40 in full color illustrate these accounts Ranging from the two pound black footed cat to the five hundred pound tiger and from the African serval with its satellite dish ears to the web footed fishing cat of Asia Wild Cats of the World will fascinate and educate felid fans of any stripe or spot *Carnivore Behavior, Ecology, and Evolution* John L. Gittleman, 2019-05-15 Because carnivores are at the top of the food chain their status is an important indicator of the health of the world ecosystem They are intensely interesting to zoologists and uniquely intriguing to the general public Devoted primarily to terrestrial carnivores this volume focuses on such themes as carnivore reintroduction programs and the ethics of studying carnivores drawing examples from a variety of species The need to evaluate new conceptual ideas and empirical data inspired this volume of Carnivore Behavior Ecology and Evolution a complement to the original book In the eight years since publication of the first volume conservation has emerged as a thematic imperative The study of carnivores has become even more important in raising and resolving crucial biological problems Differential rates of mortality in the giant panda and other endangered carnivores are now known to influence dispersal and life history patterns basic to these species survival Reintroduction efforts of the black footed ferret and the red wolf are establishing essential guidelines for preservation and management of endangered species Studies of the African lion and the dwarf mongoose illustrate the power of new genetic techniques of DNA fingerprinting for understanding the evolution of social behavior *Encyclopedia of Paleontology* Ronald Singer, 2019-06-04 The Encyclopedia of Paleontology is designed to address the shortage of general reference works on both vertebrate and invertebrate paleontology and to serve the needs of students and lay persons interested in the field As the encyclopedia aims to provide

basic information the majority of the 350 entries are devoted to explanations of paleontological concepts and techniques examinations of the evolutionary development of particular organisms and biological features profiles of major discoveries and biographies of leading scientists Each entry includes an essay and a further reading list An international team of 200 leading experts in the field has prepared the illustrations and the essays which range from concise descriptions to comprehensive discussions
