Mark Thomas McGee

The Big Heat:

The Big Heat William P. McGivern,2005-04 Originally published in 1952 this legendary crime story was the basis for the film noir classic starring Glenn Ford and Lee Marvin Homicide sergeant Dave Bannion investigates the death of a police clerk who has shot himself for no obvious reason

The Big Heat Colin McArthur,2019-07-25 The Big Heat first appeared in 1953 towards the end of the film noir cycle that had begun in the early 40s It was greeted in the United States and Britain as a successful but modest product of the Hollywood system slickly written and directed in the words of one critic Only the extreme violence as in the infamous scalding coffee scene was singled out for special mention Yet by the time the film was reissued in Britain in 1988 it had achieved undisputed classic status How had this transformation come about Colin McArthur takes The Big Heat as a case study in film criticism He examines the film s changing critical fortunes under the influence of the so called auteur theory and shows how other intellectual currents led to a reassessment of Lang s work in the 1970s

McArthur provides his own perceptive analysis of the film in the light of these revolutions in film criticism The Big Heat Jennifer LaBrecque,2007-12-01 This big bad bounty hunter can handle anything Or can he Cade Stone can t believe Sunny Templeton How did one sexy woman manage to get into so much trouble Okay so maybe she tried to take out a politician with her car Who wouldn t do the same thing But now it s landed her in jail and the local media is out for blood He s got to help her That s just the kind of guy he is Sunny thinks being in the slammer is bad until she s bailed out by tall dark and dangerous Cade Stone The bounty hunter has starred in her nightly fantasies for weeks and now he s offering to take her home He might call it protective custody but for Sunny it s an invitation to see if this bad man is as good as she thinks he is

The Big Heat Jeffrey St. Clair,Joshua Frank,2019-01-04 The world as we know it is undergoing a sudden and violent transformation unlike anything the planet has experienced since the Cretaceous Extinction The evidence is all around us vast droughts that last decades super storms and floods that destroy cities dwindling aquifers vanishing glaciers toxic water supplies raging wildfires obscure new diseases vanishing species and indigenous communities Our planet is changing faster than evolution can keep up The forces driving this radical transformation are not natural The earth has been brought to the brink by a greed based predatory economic system that chews up anything in its path and spits it out to the bitter end Environmental journalists Jeffrey St Clair and Joshua Frank take you on a sobering field trip through the danger zones from the strip mines of Appalachia to last refuge of the grizzly from the dirty fracking fields to the world s most dangerous place the Hanford Nuclear Site in the Pacific Northwest The Big Heat charts the battle lines for the future of the planet from corporate villains to corrupt politicians and the fearless environmentalists who are standing up against the pillaging This is an unflinching chronicle of the last fight that really matters
