## A “Nauseous Project”

James Madison (1751–1836) was a reluctant supporter of the Bill of Rights, although he is credited as its author. As a Federalist, Madison initially opposed adding a bill of rights to the Constitution. But his friend Thomas Jefferson and the voters of Virginia convinced Madison that a bill of rights was both philosophically sound and politically necessary.

Madison faced an uphill battle getting the Bill of Rights through the first Congress. When the legislators finally agreed to hear Madison’s suggested amendments, they criticized his proposals unmercifully. Opponents referred to Madison’s amendments as “milk and water” and “water gruel” designed to cure the imaginary illnesses of the public.

Some Anti-Federalists in Congress accused Madison of more ominous motives. By offering the people meaningless amendments, they argued, Madison was distracting attention from the serious dangers to liberty posed by a strong central government. Madison’s critics charged that his amendments were “a tub thrown out to a whale”—referring to sailors’ practice of throwing out a wooden tub to distract the whale and prevent it from attacking the ship itself.

Even George Mason, the chief advocate of a bill of rights, offered Madison little support. Mason commented that Madison had become, after his election to Congress, the “patron of amendments.” Mason added, “perhaps some milk and water propositions may be made . . . by way of throwing out

a tub to the whale; but of important and substantial amendments, I have not the least hope.”<sup>20</sup>

Congressional debates over the Bill of Rights were, in Madison’s words, “extremely difficult and fatiguing” and “exceedingly wearisome.” Indeed, members of Congress challenged each other to duels at one passionate point in the debates. After months of congressional deliberations, Madison wrote to a friend that the Bill of Rights had become a “nauseous project.”<sup>21</sup> But Madison’s skill as a lobbyist finally paid off, and Congress approved the final version of the Bill of Rights on September 25, 1789.

the Guides as the title implies is to facilitate the use of international human rights standards by their systematic presentation. Rather than reproducing full texts of various instruments, substantive standards are grouped according to subject matter in order to enable users to quickly and easily locate the topic they may be looking for. A detailed index with references to the many international instruments which address the same issue reinforces this thematic approach. The choice of human rights and health for the second volume in this series highlights the aim of the Guides to map out the entire range of human rights and fundamental freedoms as they relate to a specific topic. The sheer size of this volume illustrates the number and variety of human rights standards relevant for health. Many of these standards have been generated by organizations dealing with health rather than human rights and quite a few are found under medical ethics rather than human rights. Subsuming medical ethics under international human rights law is a novel development pioneered by the Council of Europe. Elsewhere the two fields remain separate and the publication of this Guide is intended to overcome this separation. Documents have been included which provide an understanding of human rights within the health profession such as guidance to medical doctors with regard to abortion adopted by the International Medical Association and those human rights safeguards that have been elaborated to prevent abuses by health professionals such as those concerning mental health. All of these standards provide a substantive background for inter professional dialogue on the evolving understanding of human rights. A Thematic Guide to Documents on Health and Human Rights reflects the full range of issues encompassed by human rights and health. Besides the right to health, a wide range of rights and freedoms can be and is affected by the health sector. Priority has been accorded to the crucial human rights safeguards, namely those specifying protection against undue limitations or restrictions upon human rights. Much as with any other human rights topic, those safeguards are best developed for categories that are most vulnerable to denials and violations of their rights: detainees, prisoners, victims of armed conflicts, children and the mentally ill thus figure prominently.
