The Biological And Social Analysis Of A Mississippian Cemetery From Southeast Missouri The Turner:

The Biological and Social Analyses of a Mississippian Cemetery from Southeast Missouri Thomas K. Black III, 1979-01-01
The Turner site in southeast Missouri was a small Mississippian village that was occupied about AD 1300 Along with two nearby sites Powers Fort and Snodgrass it is considered to belong to the Powers Phase In this volume Black offers a mortuary analysis of burials found at all three sites The Biological and Social Analyses of a Mississippian Cemetery from Southeast Missouri Doreen Bettina Voiles Ozker, John Chiapuris, Thomas K. Black, 1949 Archaeology of the Mississippian Culture Peter N. Peregrine, 2013-04-11 First published in 1996 In recent years there has been a general increase of scholarly and popular interest in the study of ancient civilizations Yet because archaeologists and other scholars tend to approach their study of ancient peoples and places almost exclusively from their own disciplinary perspectives there has long been a lack of general bibliographic and other research resources available for the non specialist This series is intended to fill that need

Regional Approaches to Mortuary Analysis Lane Anderson Beck, 2013-11-11 In this volume archaeologists offer a new direction for burial research by expanding the models for mortuary analysis from a site specific to a regional level Contributors explore how regional mortuary approaches allow the introduction of new questions about peer polity interactions and regional alliances extending traditional settlement system and exchange analyses This volume features case studies examining mortuary sites as components of the archaeological landscape King David Hally, 2008-09-21 At the time of Spanish contact in AD 1540 the Mississippian inhabitants in north western Georgia and adjacent portions of Alabama and Tennessee were organized into a number of chiefdoms distributed along the Coosa and Tennessee rivers and their major tributaries This book is about one such town known to archaeologists as the King site Notes on Populational Significance of Paleopathological Conditions Alejandro Pérez-Pérez, 1996 *What Mean These Bones?* Mary Lucas Powell, Patricia S. Bridges, Ann Marie W. Mires, 1991-03-30 This volume addresses questions of human adaptation in a variety of cultural contexts with a breadth not found in studies utilizing solely biological or artifactual data These nine case studies from eight Southeastern states cover more than 4 000 years of human habitation from Archaic hunter gatherers in Louisiana and Alabama to Colonial planters and slaves in South Carolina Stories from the Skeleton Robert Jurmain, 2013-09-05 This volume raises central theoretical issues regarding behavioural reconstruction in human osteological research Because behavioural reconstructions have become increasingly common especially within paleopathology it is time to review the scientific basis for such an approach For example osteological scenarios seeking to link the onset of such skeletal conditions as osteoarthritis dental disease and trauma with specific behaviours in past populations are critically examined Questions are also raised as to the scientific rigor of such hypotheses the ethnohistorical or other evidence used to support them and ultimately the soundness of such claims In addition commentary is included that broadens the scope to include anthropology and explains the utility and limitations of behavioural reconstructions in paleoanthropology and the biocultural perspective as

it is used in contemporary anthropology **Mississippian Community Organization** Michael J. O'Brien, 2001-05-31 The Powers Phase Project a multiyear archaeological program undertaken in southeastern Missouri by the University of Michigan in the late 1960s and early 1970s represents a milestone in Americanist archaeology This volume reinterprets a number of the earlier conclusions from the long term excavations of the Turner and Snodgrass sites and enhances the usefulness of the findings for archaeologists interested in the late prehistory of the Mississippi River Valley **Advances in Dental Anthropology** Mark A. Kelley, Clark Spencer Larsen, 1991-01-23 Owing to their hardness density and extreme durability in the burial matrix human teeth offer investigators a remarkably complete biological and behavioral record of past and living populations This volume chronicles the dramatic progress made in dental anthropology since the field was established in 1963 Covers a range of methodologies and addresses numerous research questions of current interest Among the topics discussed are microwear morphological variation adontometrics intentional and unintentional modification age estimation pathology enamel defects occlusal variation growth and development *Following the Mississippian Spread* Robert A. Cook, Aaron R. Comstock, 2022-06-29 This book is the first to specifically trace the movement of Mississippian maize farmers throughout the US Midwest and Southeast By providing a backdrop of shifting climatic conditions during the period this volume also investigates the relationship between farmers and their environments Detailed regional overviews of key locations in the Mississippi Valley the Ohio Valley and the peripheries of the Mississippian culture area reveal patterns and variation in the expression of Mississippian culture and interactions between migrants and local communities Methodologically the case studies highlight the strengths of integrating a variety of data sets to identify migration The volume provides a broader case study of the links between climate change migration and the spread of agriculture that is relevant to archaeologists and anthropologists studying early agricultural societies throughout the world Key patterns of adaptation to and mitigation of the effects of droughts for example provide a framework for understanding the options available to societies in the face of climate change afforded by the time depth of an archaeological perspective **Books in Print Supplement** ,1979 *Women in Prehistory* Cheryl Claassen, Rosemary A. Joyce, 1997 During the 1960s scholars constructed a model of cultural evolution in which men cooperated in the hunting of big game while women gathered plant food immobilized by pregnancy and childcare The essays in *Women in Prehistory* challenge this model as they reconsider women's social and economic roles *Changing Perspectives on the Archaeology of the Central Mississippi Valley* Michael J. O'Brien, Robert C. Dunnell, 1998-03-25 Fourteen experts examine the current state of Central Valley prehistoric research and provide an important touchstone for future archaeological study of the region The Mississippi Valley region has long played a critical role in the development of American archaeology and continues to be widely known for the major research of the early 1950s To bring the archaeological record up to date fourteen Central Valley experts address diverse topics including the distribution of artifacts across the landscape internal configurations of large fortified settlements human bone chemistry

and ceramic technology The authors demonstrate that much is to be learned from the rich and varied archaeological record of the region and that the methods and techniques used to study the record have changed dramatically over the past half century Operating at the cutting edge of current research strategies these archaeologists provide a fresh look at old problems in central Mississippi Valley research

Bioarchaeology Jane E Buikstra, Lane A Beck, 2017-03-02 The core subject matter of bioarchaeology is the lives of past peoples interpreted anthropologically Human remains contextualized archaeologically and historically form the unit of study Integrative and frequently inter disciplinary bioarchaeology draws methods and theoretical perspectives from across the sciences and the humanities Bioarchaeology The Contextual Study of Human Remains focuses upon the contemporary practice of bioarchaeology in North American contexts its accomplishments and challenges Appendixes a glossary and 150 page bibliography make the volume extremely useful for research and teaching *Arkansas Archeological Survey Research Series*, 1997 *Bioarchaeology of the North Central United States* Douglas W. Owsley, Jerome Carl Rose, 1997 *A Population History of North America* Michael R. Haines, Richard H. Steckel, 2000-08-15 Professors Haines and Steckel bring together leading scholars to present an expansive population history of North America from pre Columbian times to the present Covering the populations of Canada the United States Mexico and the Caribbean including two essays on the Amerindian population this volume takes advantage of considerable recent progress in demographic history to offer timely knowledgeable information in a non technical format A statistical appendix summarizes basic demographic measures over time for the United States Canada and Mexico Mississippian Political Economy Jon Muller, 2013-11-21 This ambitious work offers a coherent and comprehensive look at the material conditions underlying and stimulating political development in southeastern North America during the Mississippian period After introducing theoretical issues Muller addresses reproduction production distribution and consumption within their social and material contexts Examined through the lens of the production distribution and consumption of prestige and staple goods a profoundly domestic though significantly differentiated Mississippian political economy emerges This study's broad synthetic view ensures that neither environment nor ideology are overemphasized A fine statement of an important theoretical position the volume features considerable graphic and tabular presentation of data

Case Studies in Environmental Archaeology Elizabeth Reitz, C. Margaret Scarry, Sylvia J. Scudder, 2007-12-10 This book highlights studies addressing significant anthropological issues in the Americas from the perspective of environmental archaeology The book uses case studies to resolve questions related to human behavior in the past rather than to demonstrate the application of methods Each chapter is an original or revised work by an internationally recognized scientist This second edition is based on the 1996 book of the same title The editors have invited back a number of contributors from the first edition to revise and update their chapter New studies are included in order to cover recent developments in the field or additional pertinent topics
