*The Birds of St Helena* Beau W. Rowlands, 1998      **A Guide to the Birds of St Helena and Ascension Island** Neil McCulloch, 2004 A guide that presents the varied origins of the birds on the two Atlantic islands St Helena and Ascension It contains background on the islands history and biogeography and illustrated species accounts      Extinct Birds Julian P. Hume, 2017-08-24 A comprehensive review of the hundreds of bird species that have become extinct over the last 1 000 years of habitat degradation over hunting and rat introduction Extinct Birds has become the standard text on this subject covering both familiar icons of extinction as well as more obscure birds some known from just one specimen or from travellers tales This second edition is expanded to include dozens of new species as more are constantly added to the list either through extinction or through new subfossil discoveries The book is the result of decades of research into literature and museum drawers as well as caves and subfossil deposits which often reveal birds long gone that disappeared without ever being recorded by scientists while they lived From Great Auks Carolina Parakeets and Dodos to the amazing yet almost completely vanished bird radiations of Hawaii and New Zealand via rafts of extinction in the Pacific and elsewhere this book is both a sumptuous reference and astounding testament to humanity s devastating impact on wildlife      **An Annotated Checklist of the Birds of South Australia: Emus to spoonbills** , 1979      **Bulletin of the British Ornithologists' Club** British Ornithologists' Club, 2009      **Naturalised Birds of the World** Christopher Lever, 2010-01-29 This book looks at the world s naturalised successfully introduced species of bird Many species have been introduced to countries outside their natural range by people either deliberately or accidentally with varied consequences for both those species themselves and the native fauna of their new homes In Britain the introduced Canada Goose has quickly become ubiquitous at every lake and riverside while the Golden Pheasant remains a scarce and unobtrusive inhabitant of a few scattered remote woodlands The House Sparrow and Common Starling both in decline over parts of their native range are thriving in a naturalised state in North America and elsewhere in the world Naturalised populations of Mallard in various parts of the world are threatening a total of seven other duck species with extinction through hybridisation This book discusses each species in turn describing how why when and where its introduction took place how it became established and the ecological and economic impacts its presence has had in the country or countries it is naturalised in Each account has a map showing natural and introduced range and there is a wealth of beautiful line drawings of the species concerned      **African Research & Documentation** , 2001      **The Avifauna of Louisiana** George Eugene Beyer, 1900      World Checklist of Threatened Birds Tim Inskipp, 1993      **Africa** John McIlwaine, 2007 First published in 1993 this is a new revised and substantially expanded edition of a highly acclaimed reference resource that evaluates the leading sources of information other than bibliographies on Africa South of the Sahara      **Birds of the UK Overseas Territories** Roger Riddington, 2020-07-23 An authoritative guide to birds of the UK Overseas Territories The UK Overseas Territories UKOTs are scattered across the globe Most are

small islands or island complexes occurring from the Caribbean to the furthest reaches of the South Atlantic via the Indian and Pacific Oceans In terms of global biodiversity these territories are remarkably significant Among landscapes that range from coral atolls through mangroves and dry forests to the ice sheets of Antarctica the UKOTs support no fewer than 45 species of birds currently considered to be globally threatened They are also home to a third of all the world s breeding albatrosses and nine of the world s 17 species of penguin In a rapidly changing world the UKOTs symbolise global crises in climate and biodiversity Threats faced by their wildlife range from mortality of seabirds at sea through industrial fisheries and on land as a result of introduced ground predators to the utter devastation of hurricanes in the Caribbean which provide a stark reminder of our changing climate The human impact on the wildlife of our planet has been increasing for centuries but the next few decades promise to be critical This book illustrated with maps and colour photos explores the birds and other wildlife of each of the 14 UKOTs with a particular focus on environmental threats and conservation priorities Written by authors with a deep connection to the sites this book represents an important stocktake of the biological richness of these special places in the early 21st century Wildlife Abstracts ,1976 *Wildlife Abstracts* U.S. Fish and Wildlife Service,1976 **A List of the Land Birds of Santa Cruz County, California** Harry Schelwald Swarth,Joseph Grinnell,Richard Crittenden McGregor,1900 **The Cuckoos** Robert B.
