The Birds:

The Birds of Kaua'i Jim Denny, 1999-10-31 Kaua'i is the place for birdwatching in Hawai'i. Let *The Birds of Kaua'i* be your guide. Written in an appealing informal style, *The Birds of Kaua'i* offers readers an enjoyable look at the avifauna of Hawai'i's oldest island. Two of the most important and impressive sites for birdwatching in the State are located on Kaua'i: Kilauea National Wildlife Refuge and Alaka'i Wilderness Preserve. Kilauea on the island's windward shore boasts substantial populations of seabirds which can be viewed up close. Alaka'i is the most pristine native rain forest in the Islands and until two short decades ago its valleys still echoed with the songs of every native bird historically known to reside there. Today many species continue to thrive in the lush ancient forest. Superbly illustrated with more than 80 color photographs, *The Birds of Kaua'i* covers every avian species that can be seen on the Garden Island. The author's knowledge and enthusiasm are evident on each page as he describes native forest birds, seabirds, alien birds, and migratory visitors. One of the world's rarest birds is the Kaua'i 'Ō'ō, the victim of predation and extensive changes to its environment. These and other threats to the Island's fragile bird populations are discussed.

The Birds of Africa: Volume VII, 2020-06-25 This is the seventh volume in the *Birds of Africa* series, looking at the rich avifauna of the world's second largest continent. Universally recognised as by far the most authoritative work ever published on the subject, *The Birds of Africa* is a superb multi-contributor reference work with encyclopaedic species texts, stunning paintings of all species and numerous subspecies, hundreds of informative line drawings, detailed range maps, and extensive bibliographies. Each volume contains an Introduction that brings the reader up to date with the latest developments in African ornithology, including the evolution and biogeography of African birds. Diagnoses of the families and genera, often with superspecies maps, are followed by the comprehensive species accounts themselves. These include descriptions of range and status, field characters, voice, general habits, food, and breeding habits. Full bibliographies, acoustic references, and indexes complete this scholarly work of reference. This seventh volume in the series deals comprehensively with 309 species. These comprise all the seed-eating families from sparrows to buntings and including weavers, widowbirds, whydahs, and waxbills. The editors and artists have worked closely with other authors, all acknowledged experts in their field, to produce a superb reference in which comprehensive texts on every species are complemented by accurate and detailed paintings and drawings of the birds themselves.

Religion, Literature, and Scholarship: The Sumerian Composition Nanše and the Birds Niek Veldhuis, 2021-10-11 This book uses insights from religious studies, literary theory, and the history of science for understanding the Sumerian composition *Nanše and the Birds* in the context of the Old Babylonian scribal school. The discussions of Babylonian religion, literature, and scholarship focus on the usefulness and relevance of these modern concepts for categorizing the ancient text. The volume presents the first critical edition of *Nanše and the Birds* as well as editions of the hymn *Nanše B* and all third millennium and Old Babylonian lexical lists of birds. It includes 37 plates with photographs and line drawings, including many previously unpublished tablets. The final chapter

discusses the identity and orthography of all Sumerian bird names in literary administrative and lexical texts

The Birds of Africa: Volume IV, 2020-06-25 This is the fourth volume in the Birds of Africa series covering the rich avifauna of the world's second largest continent Volume IV covers the first 12 families of the passerines Universally recognised as by far the most authoritative work ever published on the subject The Birds of Africa is a superb multi contributor reference work with encyclopaedic species texts stunning paintings of all species and numerous subspecies hundreds of informative line drawings detailed range maps and extensive bibliographies Each volume contains an Introduction that brings the reader up to date with the latest developments in African ornithology including the evolution and biogeography of African birds Diagnoses of the families and genera often with superspecies maps are followed by the comprehensive species accounts themselves These include descriptions of range and status field characters voice general habits food and breeding habits Full bibliographies acoustic references and indexes complete this scholarly work of reference This fourth volume in the series deals comprehensively with broadbills pittas larks swallows and martins wagtails pipits and longclaws cuckoo shrikes bulbuls waxwings dippers wrens accentors and chats The editors and artists have worked closely with other authors all acknowledged experts in their field to produce a superb reference in which comprehensive texts on every species are complemented by accurate and detailed paintings and drawings of the birds themselves

A History of the Birds of New Zealand Walter Lawry Buller, 2023-09-29 Reprint of the original first published in 1873

Thomas R. Howell's Check-list of the Birds of Nicaragua as of 1993 Thomas R. Howell, 2010-10-10 Between December 1951 and April 1967 Thomas R. Howell made 13 separate research trips to Nicaragua The result was a collection of over 2 000 bird skins and at least 16 publications that form the backbone of Nicaraguan ornithology In the late 1970s Howell began working on a manuscript that was intended to be his major contribution to the ornithology of the country The first version of this Check list of the Birds of Nicaragua was not ready until 1983 and many different typewritten versions circulated among a small but growing number of Nicaraguan biologists for the next two decades Partly because of Howell's passion for detail and completeness and finally because of his failing health in the late 1990s the check list was never published before his death in December 2004 This monograph remedies what had become a significant obstacle to further studies in the country by providing in Howell's own words a comprehensive background for subsequent explorations It documents the 654 species 611 supported with specimen evidence known to have occurred in Nicaragua as of 1993 the date of the last substantial revision of the manuscript and also provides a rationale for anticipating another 44 species The publication of this significant chapter in the history of Central American bird studies is offered both as a tribute to Tom Howell's enthusiasm and contributions and as a frame of reference and springboard for current and future ornithologists inspired to study the rich and still largely unexplored avifauna of Nicaragua
