women's reproductive rights within the context of eugenics, modernization theory, overpopulation, and the War on Drugs. Thereby it sets out to trace both continuities and changes in the discourse on the reproductive rights of African American women that still influence our perspective on the African American family today. *The Personal and the Political* Ulrike Boehmer, 2000-05-04 An in-depth consideration of women's activism in the AIDS and breast cancer movements. *African Americans Doing Feminism* Aaronette M. White, 2012-02-01 How might ordinary people apply feminist principles to everyday situations? How do feminist ideas affect the daily behaviors and decisions of those who seek to live out the basic idea that women are as fully human as men? This collection of essays uses concrete examples to illuminate the ways in which African Americans practice feminism on a day-to-day basis. Demonstrating real-life situations of feminism in action, each essay tackles an issue such as personal finances, parenting, sexual harassment, reproductive freedom, incest, depression, and addiction, or romantic relationships, and articulates a feminist approach to engaging with the problem or concern. Contributors include African American scholars, artists, activists, and business professionals who offer personal accounts of how they encountered feminist ideas and are using them now as a guide to living. The essays included reveal how feminist principles affect people's perceptions of their ability to change themselves and society because the personal is not always self-evidently political.

Philosophies and Practices of Emancipatory Nursing Paula N. Kagan, Marlaine C. Smith, Peggy L. Chinn, 2014-07-17 Awarded First Place in the 2015 AJN Book of the Year Award in two categories: History and Public Policy and Professional Issues. This anthology presents the philosophical and practice perspectives of nurse scholars whose works center on promoting nursing research, practice, and education within frameworks of social justice and critical theories. Social justice nursing is defined by the editors as nursing practice that is emancipatory and rests on the principle of praxis, which is practice aimed at attaining social justice goals and outcomes that improve health experiences and conditions of individuals, their communities, and society. There is a lack in the nursing discipline of resources that contain praxis approaches, and there is a need for new concepts, models, and theories that could encompass scholarship and practice aimed at purposive reformation of nursing, other health professions, and health care systems. Chapters bridge critical theoretical frameworks and nursing science in ways that are understandable and useful for practicing nurses and other health professionals in clinical settings, in academia, and in research. In this book, nurses' ideas and knowledge development efforts are not limited to problems and solutions emerging from the dominant discourse or traditions. The authors offer innovative ways to work towards establishing alternative forms of knowledge capable of capturing both the roots and complexity of contemporary problems as distributed across a diversity of people and communities. It fills a significant gap in the literature and makes an exceptional contribution as a collection of new writings from some of the foremost nursing scholars whose works are informed by critical frameworks. *Organizing Black America: An Encyclopedia of African American Associations* Nina Mjagkij, 2003-12-16 With information on over 500 organizations, their founders, and membership, this unique encyclopedia is

The Alchemy of Illness Kat Duff, 1993 Illness is a universal experience There is no privilege that can make us immune to its touch We are taught to assume health illnesses being just temporary breakdowns in the well oiled machinery of the body But illness has its own geography its own laws and commandments At a time when the attention of the whole nation is focused on health care Kat Duff inquires into the nature and function of illness itself Duff a counselor in private practice in Taos New Mexico wrote this book out of her experience with chronic fatigue syndrome but what she has to say is applicable to every illness and every one of us For those who are sick this book offers solace and recognition For those who care for them either physically or emotionally it offers inspiration and compassion Finally this fresh perspective on healing reveals how every illness is a crucible that tries our mettle tests our limits and provides us with an unparalleled opportunity to integrate its lessons into our lives
