The Age of the Image Stephen Apkon, 2013-04-16 An urgent erudite and practical book that redefines literacy to embrace how we think and communicate now We live in a world that is awash in visual storytelling The recent technological revolutions in video recording editing and distribution are more akin to the development of movable type than any other such revolution in the last five hundred years And yet we are not popularly cognizant of or conversant with visual storytelling's grammar the coded messages of its style and the practical components of its production We are largely in a word illiterate But this is not a gloomy diagnosis of the collapse of civilization rather it is a celebration of the progress we've made and an exhortation and a plan to seize the potential we're poised to enjoy The rules that define effective visual storytelling much like the rules that define written language do in fact exist and Stephen Apkon has long experience in deploying them teaching them and witnessing their power in the classroom and beyond In *The Age of the Image* drawing on the history of literacy from scroll to codex scribes to printing presses SMS to social media on the science of how various forms of storytelling work on the human brain and on the practical value of literacy in real world situations Apkon convincingly argues that now is the time to transform the way we teach create and communicate so that we can all step forward together into a rich and stimulating future

Docufictions Gary D. Rhodes, John Parris Springer, 2014-10-01 Through most of the 20th century the distinction between the fictional narrative film and the documentary was vigorously maintained The documentary tradition developed side by side with but in the shadow of the more commercially successful feature film In the latter part of the century however the two forms merged on occasion and mockumentaries fictional works in a documentary format and docudramas reality based works in a fictional format became part of the film and television landscape The 18 essays here examine the relationships between narrative fiction films and documentary filmmaking focusing on how each influenced the other and how the two were merged in such diverse films and shows as *Citizen Kane* *M A S H* *This Is Spinal Tap* and *Destination Moon* Topics include the docudrama in early cinema the industrial film as faux documentary the fear evoked in 1950s science fiction films the selling of reality in mockumentaries and reality television and documentary forms The essays provide a foundation for significant

rethinking of film history and criticism offering the first significant discussion of two emerging and increasingly important genres

Ian London,2024-03-07 Hollywood Online provides a historical account of motion picture websites from 1993 to 2008 and their marketing function as industrial advertisements for video and other media in the digital age The Blair Witch Project is the most important example of online film promotion in cinema history Over the last thirty years only a small number of major and independent distributors have converted internet created buzz into box office revenues with similar levels of success Yet readings of how the film s internet campaign broke new ground in the summer of 1999 tend to minimize overlook or ignore the significance of other online film promotions Similarly claims that Blair initiated a cycle of imitators have been repeated in film publications and academic studies for more than two decades This book challenges three major narratives in studies about online film marketing Hollywood s major studios and independents had no significant relationship to the internet in the 1990s online film promotions only took off after 1999 because of Blair and Hollywood cashed in by initiating a cycle of imitators and scaling up corporate activities online Hollywood Online tests these assumptions by exploring internet marketing up to and including the film s success online Pre Blair 1993 9 then by examining the period immediately after Blair Post Blair 2000 8 which broadly coincides with the rise and decline of DVD as well as the emergence of the social media sites MySpace Facebook and Twitter

American Scary Jeremy Dauber,2024-10-01 America is the world s biggest haunted house and American Scary is the only travel guide you need I loved this book Grady Hendrix New York Times bestselling author of How to Sell a Haunted House and The Final Girl Support Group From the acclaimed author of American Comics comes a sweeping and entertaining narrative that details the rise and enduring grip of horror in American literature and ultimately culture from the taut terrifying stories of Edgar Allan Poe to the grisly lingering films of Jordan Peele America is held captive by horror stories They flicker on the screen of a darkened movie theater and are shared around the campfire They blare out in tabloid true crime headlines and in the worried voices of local news anchors They are consumed virally on the phones in our pockets Like the victims in any slasher movie worth its salt we can t escape the thrall of scary stories In American Scary noted cultural historian and Columbia professor Jeremy Dauber takes the reader to the startling origins of horror in the United States Dauber draws a captivating through line that ties historical influences ranging from the Salem witch trials and enslaved

person narratives directly to the body of work we more closely associate with horror today the weird tales of H P Lovecraft the lingering fiction of Shirley Jackson the disquieting films of Alfred Hitchcock the up all night stories of Stephen King and the gripping critiques of Jordan Peele With the dexterous weave of insight and style that have made him one of America s leading historians of popular culture Dauber makes the haunting case that horror reveals the true depths of the American mind Digital Aboriginal Mikela Tarlow, Philip Tarlow, 2002-04-24 The Aborigine s view of the world suggests that all things are interconnected Every relationship in turn influences every other relationship Along these same lines this book reveals how the modern day business world organizes this unlimited range of possibilities and how readers can reorganize and redirect business plans merely by shifting marketing beliefs **Film Review** ,2006
