**Chronicle of a Blood Merchant** Yu Hua, 2007-12-18 From the acclaimed author of *Brothers and Sisters* and *The Fourth Deadly Sin* here is Yu Hua's unflinching portrait of life under Chairman Mao A cart pusher in a silk mill Xu Sanguan augments his meager salary with regular visits to the local blood chief His visits become lethally frequent as he struggles to provide for his wife and three sons at the height of the Cultural Revolution Shattered to discover that his favorite son was actually born of a liaison between his wife and a neighbor he suffers his greatest indignity while his wife is publicly scorned

as a prostitute Although the poverty and betrayals of Mao's regime have drained him Xu Sanguan ultimately finds strength in the blood ties of his family With rare emotional intensity grippingly raw descriptions of place and time and clear eyed compassion Yu Hua gives us a stunning tapestry of human life in the grave particulars of one man's days The Lancet London ,1829 Machine readable labels in the blood transfusion service J. Jenkins,2012-12-06 Dr W J Jenkins In 1977 when the Sheffield Transfusion Centre took delivery of the first GROUPAMATIC blood grouping machine in the UK it was equipped with a sample identification system involving complicated and expensive disposable punched cards In fact the cards were so expensive that Dr Wagstaff was unable to find the revenue to support the system A year later when Brentwood took delivery of a GROUPAMATIC we were faced with the same problem but by chance we heard that KONTRON was developing a laser scanning system for bar code labels and we were able to have our machine modified Subsequently the Sheffield machine was altered to take the bar code scanner At about the same time the Bristol Centre was helping TECHNICON with the development of the AUTO GROUPE C 16 and fortunately they decided on a laser reader of the same type for bar code identification Thus there were three centres with the capability for reading bar codes on blood grouping machines and it became necessary to find someone to produce the bar code labels There was only one printer in the UK who could produce labels to the required specification To cut the costs of printing and in the hope of avoiding a wide variation in codes I invited representatives of centres interested in the problem to a meeting where we set up what we called the Group of Six This later became an official Working Party of the Regional Transfusion Directors
