The Blue Star Millennium:

The Blue-Star Millennium David Gaughan, When Zakeera is asked to take over the body of a senator running for president in an attempt to save our environment he s faced with the challenge of giving up is current identity as a star ship Commander of the Astar Galactic Command With the full strength of the negative Darket forces pitted against him Zakeera s mission is to try to convince terrestrials to vote him into power in time to make the necessary changes to save our world from environmental backlash Captivating and thought provoking this book is another masterpiece of the author The way the author tells the story made me feel like I was watching a blockbuster movie The message of the book is indeed very relevant to what s happening to our world right now A must read for those who seek answers to existential questions and those who simply want to read an enjoyable and out of this world adventure reviewed by Liz2020 Merging the realms between fiction and fact past and future into a thought provoking tale of two worlds and one future the central theme of this book is the conservation crises facing planet Earth and this forms the backdrop as we follow the adventures of the Blue Star Zakeera of the Astar Galactic Command Prequel to the Aaden Blue Star series it is written from the viewpoint of an extra terrestrial civilization a union of star groups concerned about humankind s misuse of planet Earth Will Zakeera succeed in his mission of convincing terrestrials to vote for him in time to make the necessary changes to save our world Will the negative Darket forces achieve their aim of convincing enough people to turn against him Whoever wins this battle will determine the future of our world as we know it Get your copy of The Blue Star Millennium and start reading this prequel to the Aaden Blue Star series today

Aaden Blue-Star Awakening David Gaughan,2024-06-28 A normal teen discovers he s an ET time traveler When his superhuman powers awaken after a freak accident he also discovers his extraterrestrial heritage Able to sense danger and read peoples auras and thoughts his life couldn t get any more strange until he discovers his connection with two inter dimensional champions who are here on a time travel mission to help save our world from environmental disaster With a backdrop of climate change and environmental issues Aaden struggles to balance his life as he knows it with increasingly vivid recollections of another life With his sister Tiffany and his best friend Fleur who are the only two he can confide in he discovers his heritage and the special connection with two inter dimensional champions and their mentor Varoon His grip on reality is challenged even further when he realizes that one of these inter dimensional champions and his father are interconnected They have all been brought back together at a time when the Earth is threatened not only by the darker forces working against them but also by ecological disaster brought about by humanity Their journey emphasizes the Power of Attraction where the combined concentrated positive thought energy of the masses can bring about miraculous changes in our world Their nemesis the dark Lord Belial is just as determined to influence human development and dominate the world Throughout their trials it is Varoon s wisdom and influence that helps them rise to the challenge The ensuing battle with the darker forces results in a climax that challenges the reader to determine the truth in Varoon s words Life is a dream and you

are the dreamer In comparison with other books in this genre one reviewer described this one as an imaginative extremely creative story while another reviewer said the plot was unique I've never read a book about a boy who got powers from a lightning strike and it was a really cool concept also interesting is that it revolves around today's environmental issues and shows some ways that might help fix them Readers who enjoyed the Harry Potter series would find this an easy and absorbing read although the wizard in this story is an ET and the action is more of a blend of Star Wars and Indiana Jones in a modern day climate crisis setting

Quest for Genesis David Gau-Ghan, 2000-03-24 How much power do we have over our own destiny This question has intrigued humanity throughout history and many believe that they have total free will while others tend to play the role of victim The truth lies somewhere in between Journey with Zakeera Blue Star Commander as he travels to the inner earth in search of the Genesis machine a device installed by the Founders who originally prepared the Earth for habitation In legends of old it is said that the one who controls Genesis will possess the power to control the universe Join Zakeera in his quest as he confronts his darker side and discovers the power inherent within each one of us plus the choices we have in using this power to change our world

The Akashic Records Keeper David Gaughan, The Akashic record is a register of every manifestation in the universe past present and future it is a record of every individual and every action from the beginning of time The Akashi Records Keeper referred to as the ARK was present from the beginning of life on planet Earth although its location and function has since been lost in antiquity Zakeera a starship commander of the Altar Galactic Command has been charged with finding the location of the ARK Traveling back in time his journey begins with the project rainbow Philadelphia experiment 1943 an experiment with radar invisibility that resulted in the disruption of the time space continuum The Nikola Tesla Philadelphia experiment ship USS Eldridge physically disappeared from its location in Philadelphia harbor opening a rip in time that also dragged in an extraterrestrial spaceship Zakeera's mission to rescue the pilot of that spaceship leads him to discover a hollow earth entrance to the kingdom of Agatha Shamballa His adventures in hollow earth Agatha ultimately require him to time travel into the future where he finally realises the meaning behind the words of his mentor who when sending him on this mission told him that whoever discovers and controls the ARK the Akashi Records Keeper has the power to control the universe

stations removing those not found in the Bible and replacing them with stations that more accurately follow scriptural accounts of Christ's passion. The revised Stations of the Cross focuses on the condemned Jesus and on the community walking the way with him to the cross. Unrelieved by stories like Veronica's wiping blood off the face of Jesus and his meeting with his mother, this is a story of an execution. The new stations deal directly with the pain, suffering, betrayal, and injustice to which Jesus was subjected. In explaining his reasons for revising the stations, the Pope has said that the alterations are intended to serve as a model for other devotions and to encourage the return to the Scriptures as the source of and inspiration for contemporary worship. In this helpful authoritative guide, Megan McKenna presents the fourteen new stations with the scriptural passages that Pope John Paul II uses on Good Friday. She also provides a basic introduction to the practices and reflections on the importance of the devotion for present-day Catholics and Episcopalians.

A First Course on Symmetry, Special Relativity and Quantum Mechanics Gabor Kunstatter, Saurya Das, 2022-02-18 This book provides an in-depth and accessible description of special relativity and quantum mechanics, which together form the foundation of 21st-century physics. A novel aspect is that symmetry is given its rightful prominence as an integral part of this foundation. The book offers not only a conceptual understanding of symmetry but also the mathematical tools necessary for quantitative analysis. As such, it provides a valuable precursor to more focused advanced books on special relativity or quantum mechanics. Students are introduced to several topics not typically covered until much later in their education. These include space-time diagrams, the action principle, a proof of Noether's theorem, Lorentz vectors and tensors, symmetry breaking, and general relativity. The book also provides extensive descriptions on topics of current general interest, such as gravitational waves, cosmology, Bell's theorem, entanglement, and quantum computing. Throughout the text, every opportunity is taken to emphasize the intimate connection between physics, symmetry, and mathematics. The style remains light despite the rigorous and intensive content. The book is intended as a stand-alone or supplementary physics text for a one- or two-semester course for students who have completed an introductory calculus course and a first-year physics course that

includes Newtonian mechanics and some electrostatics Basic knowledge of linear algebra is useful but not essential as all requisite mathematical background is provided either in the body of the text or in the Appendices Interspersed through the text are well over a hundred worked examples and unsolved exercises for the student *The CIA World Factbook 2016* Central Intelligence Agency, 2015-11-24 From Afghanistan to Zimbabwe The CIA World Factbook 2016 offers complete and up to date information on the world's nations This comprehensive guide is packed with detailed information on the politics populations military expenditures and economics of 2015 For each country The CIA World Factbook 2016 includes Detailed maps with new geopolitical data Statistics on the population of each country with details on literacy rates HIV prevalence and age structure New data on military expenditures and capabilities Information on each country's climate and natural hazards Details on prominent political parties and contact information for diplomatic consultation Facts on transportation and communication infrastructure And much more Also included are appendixes with useful abbreviations international environmental agreements international organizations and groups weight and measure conversions and more Originally intended for use by government officials this is a must have resource for students travelers journalists and business people with a desire to know more about their world
