Suicide and the Body Politic in Imperial Russia Susan K. Morrissey, 2007-01-04 In early twentieth century Russia suicide became a public act and a social phenomenon of exceptional scale a disquieting emblem of Russia's encounter with modernity This book draws on an extensive range of sources from judicial records to the popular press to examine the forms meanings and regulation of suicide from the seventeenth century to 1914 placing developments into a pan European context It argues against narratives of secularization that read the history of suicide as a trajectory from sin to insanity crime to social problem and instead focuses upon the cultural politics of self destruction Suicide the act the body the socio medical problem became the site on which diverse authorities were established and contested not just the priest or the doctor but also the sovereign the public and the individual This panoramic history of modern Russia told through the prism of suicide rethinks the interaction between cultural forms individual agency and systems of governance      **Nationalism and the**

**Body Politic** Lene Auestad, 2018-05-01 This volume aims to question the recent revival of neo nationalist policies in the light of what unconscious fantasies are involved in these developments It examines both recent movements of right wing extremism and the way in which rearticulated neo ethnic ideas have been adopted by mainstream politicians and in mainstream public discourse Politicians from other than the right wing populist parties have tended to resist specific ways of talking that are considered too extremist rather than their underlying frame of interpretation Governments across Europe have adopted anti immigrant and anti Roma policies Xenophobia and hostility towards others is on the rise along with appeals to Tradition and Security Cultures of fear are linked with fantasies of fusion or imagined sameness Alongside the image of the nation as a mother and or father Reich 1933 called attention to the fantasy of the nation as a body echoed in Money Kyrle's 1939 characterization of group hypochondria in connection with the burning of witches and heretics      **I**

Drummond, 1997-09-30 Drummond explores a series of philosophic ethnographic and legal dilemmas produced by the interaction between legal cultures setting up a dialogue between narrative and theory by interspersing accounts of her field experiences in Inuit communities with analytical chapters In the first section she addresses problems of delivery of justice among Inuit communities and explores the cultural determinacy of understanding In the second section she focuses on the problem of family violence and the complexities to which it gives rise in rendering justice in Inuit communities In the third section she provides an ethnographic account of Nunavik's first sentencing circle underlining her contention that juridical

book compares five cities that have been home to major trafficking organizations for the past four decades Cali and Medellín in Colombia and Ciudad Juárez Culiacán and Tijuana in Mexico She shows that violence escalates when trafficking organizations compete and the state security apparatus is fragmented However when the criminal market is monopolized and the state security apparatus cohesive violence tends to be more hidden and less frequent The size of drug profits does not determine violence levels and neither does the degree of state weakness Rather the forms and scale of violent crime derive primarily from the interplay between marketplace competition and state cohesiveness An unprecedentedly rich empirical account of one of the worst problems of our era the book will reshape our understanding of the forces driving organized criminal violence in Latin America and elsewhere      **British Book News** British Council,1992 Includes no 53a British wartime books for young people      **The Literary Panorama, and National Register** ,1812      *British Book News* ,1991
