The Bomber Offensive:

Bomber Offensive Arthur Harris, 2005-03-01 The Royal Air Force commander of bombing operations during WWII offers an insider's view of his legendary career in this classic military memoir Marshal of the Royal Air Force Sir Arthur Bomber Harris remains a controversial figure in the history of the RAF While many vilify him for his merciless carpet bombing of Germany others believe that his contributions to Allied victory are grossly undervalued In *Bomber Offensive* Harris candidly describes how he led the men of Bomber Command in the face of appalling casualties his fierce disagreements with higher authority and the complicated relationship he had with Winston Churchill Written soon after the close of the Second World War Harris's memoirs reveals the man behind the Allied bombing offensive that destroyed the Nazi war machine but also many beautiful and historic cities such as Dresden His defense of these total war tactics stands in stark contrast to modern military policy which considers such indiscriminate killing a war crime

The Combined Bomber Offensive 1943 - 1944

L. Douglas Keeney, 2013 In a time when tanks and battleships were the proven tools of war a team of gutsy planners and a bold President of the United States approved a plan to destroy Adolf Hitler's Germany using airplanes B 17s and B 24s It was called strategic bombing a gutsy leap of faith in an entirely unproven weapon called the bomber on which the fate of World War II hinged But why were military planners certain that World War II could be won by bombers Part of Keeney's *Lost Histories of World War II* series *The Strategic Bombing Offensive 1943 1944* is the definitive in depth history of the evolution of the Combined Bomber Offensive against Germany from an idea on paper into a powerful shock and awe tool of war that lasts to this day In each chapter the vicious air war against the Luftwaffe air and ground defenses unfolds including the terrible losses to American aircrews which precipitated the massive changes in American air tactics that turned it around until victory was in sight and the final bombs were dropped on Berlin That is this history recovered and in print now for the first time since 1945

The Bombers and the Bombed Richard Overy,2014-02-20 The ultimate history of the Allied bombing campaigns in World War II Technology shapes the nature of all wars and the Second World War hinged on a most unpredictable weapon the bomb Day and night Britain and the United States unleashed massive fleets of bombers to kill and terrorize occupied Europe destroying its cities The grisly consequences call into question how moral a war the Allies fought *The Bombers and the Bombed* radically overhauls our understanding of World War II It pairs the story of the civilian front line in the Allied air war alongside the political context that shaped their strategic bombing campaigns examining the responses to bombing and being bombed with renewed clarity The first book to examine seriously not only the well known attacks on Dresden and Hamburg but also the significance of the firebombing on other fronts including Italy where the crisis was far more severe than anything experienced in Germany this is Richard Overy s finest work yet It is a rich reminder of the terrible military

technological and ethical issues that relentlessly drove all the war s participants into an abyss **The Bomber War** Robin Neillands,2002 The bomber campaign was the most controversial of World War II Did it help bring Germany to her knees Was the RAF wrong to bomb cities Did the USAAF really attack only military targets Was anything achieved but the death of women and children If not are the bombers and especially Sir Arthur Harris war criminals Or were all means justified against the Nazis Robin Neillands examines every detail of the campaign and also the day by day night by night endurance of the crews flying to the limit well aware of their fate if shot down He draws on the personal experiences of not only British but of American Australian Canadian and other Allied fliers as well and also of German aircrew and civilians Neillands also examines the moral issues and the case against Harris in particular This text aims to contribute to the history of conflict the age of freefall bombs has passed but veterans are still alive to state their case and to tell a new generation what their war was like Bombing the European Axis Powers Richard G Davis,2010-05-31 This undertaking is a work of unusual form At

Second World War dealing with Bomber Command's air offensive against Germany covers the final year of the offensive from April 1944 to May 1945. It is a story of growing allied strength and technical effectiveness. In July 1944 more than 5 000 RAF and USAF bombers were raining down bombs on Germany from their bases in Britain and Italy. In March 1944 the peak month the RAF alone dropped more than 67 000 tons of bombs and the Allies between them more than 130 000 tons. Yet all this was achieved against a background of continued controversy among the Allied air chiefs over the purpose of the bombing. The old squabbles over whether precision or general area bombing should be the main aim re-opened now that the allies had the capacity to do either both at night and in daylight. In addition the allied offensive was from early 1944 onwards increasingly subjected to the needs of Operation Overlord the invasion of German occupied Europe. As well as pounding the industrial heart of Germany to achieve air superiority disruption of German production and a slump in German civilian morale the RAF and USAF were expected to prepare for and subsequently support the invasion. Despite this diversion as Bomber Command switched to devastating the French railway system relentless attacks on Germany went on particularly on oil production. But the head of Bomber Command Sir Arthur Harris continued to insist on the primacy of area bombing of German cities in the teeth of growing doubts among Sir Charles Portal's Air Staff and in October 1944 write the authors the strategic air offensive was resumed with unprecedented violence. But the unresolved differences between Portal Harris and Air Marshal Sir Arthur Tedder who favoured attacking enemy communications above all remained say the authors a tragic deadlock. Probably the darkest shadow hanging over the final months of the air offensive however was the massive raid on Dresden in February 1945. In this attack made by the RAF by night and the USAF by day many thousands of civilians died and the city centre was totally razed. Dresden was and remains hugely controversial and was even criticised by Churchill although as the authors point out it was he himself who contributed much of the incentive to carry it out. Despite such clashes and controversies however as the authors insist the actual operations were an undoubted triumph and the war in Europe ended with Harris's aim achieved a devastated Germany with her industrial productivity destroyed and the centres of her cities in ruins.
