Downes, 2011-05-15 Accidental harm to civilians in warfare often becomes an occasion for public outrage from citizens of both the victimized and the victimizing nation In this vitally important book on a topic of acute concern for anyone interested in military strategy international security or human rights Alexander B Downes reminds readers that democratic and authoritarian governments alike will sometimes deliberately kill large numbers of civilians as a matter of military strategy What leads governments to make such a choice Downes examines several historical cases British counterinsurgency tactics during the Boer War the starvation blockade used by the Allies against Germany in World War I Axis and Allied bombing campaigns in World War II and ethnic cleansing in the Palestine War He concludes that governments decide to target civilian populations for two main reasons desperation to reduce their own military casualties or avert defeat or a desire to seize and annex enemy territory When a state s military fortunes take a turn for the worse he finds civilians are more likely to be declared legitimate targets to coerce the enemy state to give up When territorial conquest and annexation are the aims of warfare the population of the disputed land is viewed as a threat and the aggressor state may target those civilians to remove them Democracies historically have proven especially likely to target civilians in desperate circumstances In Targeting Civilians in War Downes

explores several major recent conflicts including the 1991 Persian Gulf War and the American led invasion of Iraq in 2003 Civilian casualties occurred in each campaign but they were not the aim of military action In these cases Downes maintains the achievement of quick and decisive victories against overmatched foes allowed democracies to win without abandoning their normative beliefs by intentionally targeting civilians Whether such restraint can be guaranteed in future conflicts against more powerful adversaries is however uncertain During times of war democratic societies suffer tension between norms of humane conduct and pressures to win at the lowest possible costs The painful lesson of Targeting Civilians in War is that when these two concerns clash the latter usually prevails

The P-38 Lightning and the Men Who Flew It

Wolfgang W. E. Samuel, 2025-04-15 The P 38 Lightning was one of the fastest operational fighters of World War II famous for its successes in North Africa and the Pacific In The P 38 Lightning and the Men Who Flew It Wolfgang W E Samuel shares the stories of the young men who climbed into the cockpits of the P 38 to fight for freedom and of those who created tested and deployed these fearsome machines The P 38 was the product of the Lockheed Corporation the first fighter they ever built principally conceptualized by Kelly Johnson whose design was to meet Air Corps specifications To do that he came up with a twin engine aircraft with a tricycle landing gear unlike any other military aircraft of the time But it was no easy plane to fly Many pilots died in training and routine flying before ever meeting an opponent in combat P 38 units were formed quickly once the United States entered World War II in December 1941 Training was rushed to get pilots and planes to Europe as quickly as possible to serve as bomber escorts Although the P 38 could fly at the high altitudes the bombers flew it was not the right aircraft for the mission Without an engine in front of the cockpit to keep the pilot warm the plane was frigid Pilots suffered and were sometimes so weakened by the brutal cold that they had to be lifted out of the cockpit upon landing and the bombers suffered severe losses In North Africa s warmer air however the P 38 came into its own With four 50 caliber machine guns and a 20mm cannon in its nose the P 38 was a formidable adversary With proven success in the Mediterranean P 38 squadrons were transferred to the Pacific Theater where they flourished Focusing on the men who flew this challenging aircraft and the men who designed and decided how to deploy it Samuel shares stories of bravery and ingenuity alongside an aviation history long neglected The P 38 s deployment is covered in some detail including the actions of Richard Bong who became the US forces ace of aces In the Pacific skies the P 38 its pilots and designers made the heroic history captured here
