Knowledge and Culture in the Early Dutch Republic Klaas Berkel,Albert Clement,Arjan Dixhoorn,2025-10-01 The Dutch Republic around 1600 was a laboratory of the Scientific Revolution of the seventeenth century Here conditions were favourable for the development of new ways of knowing nature and the natural philosopher Isaac Beeckman who was born in Middelburg in 1588 was a seminal figure in this context He laid the groundwork for the strictly mechanical philosophy that is at the heart of the new science Descartes and others could build on what they learned directly or indirectly from Beeckman As previous studies have mainly dealt with the scientific content of Beeckman s thinking this volume also explores the wider social scientific and cultural context of his work Beeckman was both a craftsman and a scholar and fruitfully combined artisanal ways of knowing with international scholarly traditions Beeckman s extensive private notebook offers a unique perspective on the cultures of knowledge that emerged in this crucial period in intellectual history **The Microscope in the Dutch Republic** Edward G. Ruestow,1996 Focusing on the two seventeenth century pioneers of microscopic discovery the Dutchmen Jan Swammerdam and Antoni van Leewenhoek Ruestow demonstrates that their uneasiness with their social circumstances spurred their discoveries Though arguing that aspects of Dutch culture impeded serious research with the microscope Ruestow also shows however that the culture of the period shaped how Swammerdam and Leewenhoek responded to what they saw through the lens He concludes by emphasising how their early microscopic efforts differed from the institutionalised microscopic research that began in the nineteenth century Russia & Europe in the Nineteenth Century Sphinx Fine Art,Edward Strachan,Roy Bolton,2008 **A Corpus of Rembrandt Paintings IV** Ernst van de Wetering,2010-07-19 Volume IV of A Corpus of Rembrandt Paintings deals uniquely with the self portraits of Rembrandt In a clearly written explanatory style the head of the Rembrandt Research Project and Editor of this Volume Ernst van de Wetering discusses the full body of work of paintings and etchings portraying Rembrandt He sets the different parameters for accepting or rejecting a Rembrandt self portrait as such whilst also discussing the exact working environment of Rembrandt and his apprentices This workshop setting created a surroundings where apprentices could be involved in working on Rembrandt paintings making it more difficult to determine the hand of the master Van de Wetering who is one of the Rembrandt experts of our day and age goes down to great detail to explain how the different self portraits are made and what techniques Rembrandt uses also giving an overview of which paintings are to be attributed to the Dutch Master and which not In the additional catalogue the self portraits are examined in detail In clear and accessible explanatory text the different paintings are discussed larded with immaculate images of each painting Details are shown where possible as well as the results of modern day technical imaging like X radiography This work of art history and art research should be part of

every serious art historical institute university or museum Nowhere in the art history have all Rembrandt's self portraits been discussed in such detailed and comparative manner by an authority such as Ernst van de Wetering This is a standard work for decades to come Peasant Scenes and Landscapes Larry Silver, 2012-01-04 Larry Silver investigates the origins of new pictorial types and their media as a phenomenon of sixteenth century Antwerp and interprets several pictorial genres as he charts their evolution and their role in the development and marketing of individual artistic styles The Origins of the Telescope Albert Van Helden, Sven Dupré, Rob van Gent, 2010 The origins of the telescope have been discussed and debated since shortly after the instrument's appearance in The Hague in 1608 Civic and national pride have led local dignitaries popular writers and numerous scholars to search the archives and to construct sharply divergent histories Did the honor of the invention belong to the Dutch to the Italians to the English or to the Spanish And if the city of Middelburg in the Netherlands was in fact the cradle of the instrument was the true inventor Hans Lipperhey or his rival Zacharias Jansen Or was the instrument there before anyone knew it Over the past several decades a group of historians and scientists have sought out new documents re-examined familiar ones and tested early lenses and telescopes This volume contains the proceedings of a symposium held in Middelburg in September 2008 to mark 400 years of the telescope The essays in it taken as a whole present a new and convincing account of the origins of the instrument that changed mankind's vision of the universe
