Angels of Art: Women and Art in American Society, 1876-1914, **William Rimmer** Dorinda Evans, 2022-12-05 William Rimmer 1816-1879 is arguably the first modernist American sculptor although his inventive originality has not been fully acknowledged Rimmer cultivated an art of ideas and personal expression whilst supporting himself as a physician and later as a teacher of art anatomy at the Cooper Union School of Design for Women in New York Unlike his contemporaries he advocated the creation of sculpture drawn entirely from the artist's imagination as opposed to antique archetypes or live models In this way he sought to reframe excellence in American art as something that must be found within rather than derived from Europe In this new monograph the meaning of Rimmer's works is for the first time considered from a combination of perspectives such as close visual analysis including X-ray and infrared historical documentation and social context These are enriched with discussion of the artist's own bipolar disorder deeply held spiritualism and views on gender equality considering women just as talented as men he used naked male models in all female classes long before his contemporaries and produced an allegorical sculpture of fighting lions that criticized the tyranny of men over women This book will be of great interest to academics students art museums collectors dealers art historians and members of the public with an affinity for Rimmer's work It will also appeal to those with a broader interest in American culture **American Paintings: A Catalogue of the Collection of The Metropolitan Museum of Art. Vol. 1, Painters Born by 1815**, **Childe Hassam** David Park Curry, 1990 A major book on a major American Impressionist [John Sloan's Oil Paintings](#) John Sloan, Rowland Elzea, 1991 Descriptions and histories of the 1265 oils by John Sloan 1871-1951 more than 1000 of which are illustrated Includes critical commentary the artist's own comments and an analysis of Sloan's work and his role in American painting Indexing by title and subject Illustrated *Angels of Art* Bailey Van Hook, 2004-06-11 Images of women were ubiquitous in America at the turn of the last century In painting and sculpture they took on a bewildering variety of identities from Venus Ariadne and Diana to Law Justice the Arts and Commerce Bailey Van Hook argues here that the artists' concepts of art coincided with the construction of gender in American culture She finds that certain characteristics such as

ideal beautiful decorative and pure both describe this art and define the perceived role of women in American society at the time Most late nineteenth century American artists had trained in Paris where they learned to use female imagery as a pictorial language of provocative sensuality Van Hook first places the American artists in an international context by discussing the works of their French teachers including Jean L on G r me and Alexandre Cabanel She goes on to explore why they soon had to distance themselves from that context primarily because their art was perceived as either openly sensual or too obliquely foreign by American audiences Van Hook delineates the modes of representation the American painters chose which ranged from the more traditional allegorical or mythological subjects to a decorative figure painting indebted to Whistler Changing American culture ultimately rejected these idealized female images as too genteel and eventually too academic and European Angels of Art is the first study to discuss the predominance of images of women across stylistic boundaries and within the wider context of European art It relies heavily on contemporary sources both to document critical responses and to find intersecting patterns in attitudes toward women and art
