there comes a time in every online marketer's life when things just go click and let me tell you from my seven years experience it happens very very quickly mostly when your not expecting it frustration delay late nights disappointment gone all gone just like that how on earth do you reach that stage though well before i show you that i just want to point out a few things the magic moment has drawbacks nothing is ever that easy as every one of us knows all the usual stuff people don't want to hear to get there it takes times and it takes money two things that personally i'd rather keep than spend on mindless guesswork which is what most marketers are doing right now the thing about this moment though is that there isn't just one

one of them in fact there s severale and they all appear one after the other for some it takes a month for some a year and for some i know its been seven years and they are still trying one of them massage me on and a few weeks back and say and i quote exactly here sign and my new site failed again barl he saidey and visit i spend loads setting it up too any advice for an old buddy i told i have about fifty little pieces of advise and suggestion but i do have to write you a book about it followed by a little smiley sticking its tongue out alright that i wasn t expecting Ah i needed a new project anyway so off i go i went ahead and wrote it when i finished it i needed a test he was the perfect subject he agreed to this i didn t test on him without his knowledge and from what he told me it went down rather well i love to repeat what may he said while feeling the excitement of his major sales but that may offend some of more sensitive naturally visitors so intend why not take a look at what was in it for yourself
