configure a basic Samba server and then move on to learn about Samba's more exotic features including those new to Samba 3.0. The topics in this book are approached from both an experienced Unix user and an administrator's point of view to help you optimize Samba. Samba is an efficient file and print server that enables you to get the most out of your computer hardware. In Samba 3.0 many important features have been added particularly in the realm of domain administration and membership such as improved support for membership in Windows 200x domains and a wider array of authentication options. Samba also boasts several advanced features with which you can perform very complex tasks. For instance Samba can control an NT domain, burn CD-Rs with drag and drop operations from the client and function as part of a network backup system. The Samba dance after which the server is named is known for its liveliness and the server is similarly energetic and dynamic. So join in you may make a misstep or two but this book will help you avoid making too many and you'll soon be doing the TCP/IP Samba along with the best.

**Computer Aided Verification** Ed Brinksma, Kim G. Larsen, 2002-07-19 This volume contains the proceedings of the conference on Computer Aided Verification CAV 2002 held in Copenhagen Denmark on July 27-31 2002. CAV 2002 was the 14th in a series of conferences dedicated to the advancement of the theory and practice of computer assisted formal analysis methods for software and hardware systems. The conference covers the spectrum from theoretical results to concrete applications with an emphasis on practical verification tools including algorithms and techniques needed for their implementation. The conference has traditionally drawn contributions from researchers as well as practitioners in both academia and industry. This year we received 94 regular paper submissions out of which 35 were selected. Each submission received an average of 4 referee reviews. In addition the CAV program contained 11 tool presentations selected from 16 submissions. For each tool presentation a demo was given at the conference. The large number of tool submissions and presentations testifies to the liveliness of the field and its application. [The Routledge International Handbook of New Digital Practices in Galleries, Libraries, Archives, Museums and Heritage Sites](#) Hannah Lewi, Wally Smith, Dirk vom Lehn, Steven Cooke, 2019-10-29 The Routledge International Handbook of New Digital Practices in Galleries Libraries Archives Museums and Heritage Sites presents a fascinating picture of the ways in which today's cultural institutions are undergoing a transformation through innovative applications of digital technology. With a strong focus on digital design practice the volume captures the vital discourse between curators exhibition designers historians heritage practitioners technologists and interaction designers from around the world. Contributors interrogate how their projects are extending the traditional reach and engagement of institutions through digital designs that reconfigure the interplay between collections public knowledge and civic society. Bringing together the experiences of some of today's most innovative cultural institutions and thinkers the Handbook provides refreshingly new ideas and directions for the exciting digital challenges and opportunities that lie ahead. As such it should be essential reading for academics students designers and professionals interested in the production of culture in the post digital age.
